DIRECTIONS

To control adult mosquitoes, apply as a fog or fine mist using good mechanical, thermal or compressed air equipment. For best results, treat when wind velocity does not exceed 5 miles per hour. Application in the evening or early morning is recommended.

Treat area thoroughly with particular attention to low and marshy places, shore lines, stagnant pools or ponds and shrubbery or vegetation where mosquitoes may rest. Apply at a rate of 0.6 gallons per acre (or 1.8 fluid ounces per 1000 square feet).

Using truck mounted or mobile equipment, the above application rate will result if a 400 foot swath is laid down traveling at 5 m.p.h. and dispersing spray at a rate of 150 gallons per hour. May also be applied by aircraft.

INDOOR USE: To control mosquitoes, flies, gnats and flying moths. Remove pets, cover fish aquaria and close windows and doors. Fill the room with mist, using one ounce per 1000 cubic feet of space. Keep room closed for 10 minutes. Vacate during treatment and ventilate before reoccupying.

The use of this product in food processing plants should be confined to time periods when the plant is not in operation. ~~Food~~ should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

CAUTION: Do not apply outdoors when conditions favor drift from intended area of treatment.

This product is toxic to fish. Use only as directed and do not contaminate lakes, streams, or ponds by cleaning of equipment or disposal of wastes.

Do not reuse empty containers. Destroy can: by perforating or crushing and burying in a safe place. Drums should be returned to the drum reconditioner or destroyed by perforating or crushing and burying in a safe place away from water supplies.
