

[4816-470]
NEO-PYNAMIN NIA 17370

MULTI-PURPOSE INSECTICIDE CONCENTRATE

EPA Reg. No. 4816-470

A Water Emulsifiable Insecticide Concentrate

Combining Two New Highly Active Synthetic Pyrethroid Compounds

ACTIVE INGREDIENTS:

- *Tetramethrin 1.50
- Related compounds 1.14
- ** (5-Benzyl-3-turyl-methyl-1,2-dimethyl-3-
(2-methylpropenyl)-cyclopropanecarboxylate 1.50
- Related compounds 1.49

INERT INGREDIENTS

- *1 Cyclohexene 1,2-bis(carbonyl-methyl-2,2-dimethyl-3-
-methylpropenyl)-cyclopropanecarboxylate
- **Cis-trans isomer ratio may vary from 1:1 and may be up to 1:2

NEO-PYNAMIN IS A REGISTERED TRADEMARK OF FMC CORPORATION

CAUTION

Keep Out Of Reach Of Children

See rear panel for additional precautions

DIRECTIONS FOR USE

The active components of this insecticide concentrate are the synthetic pyrethroids, tetramethrin and the related compounds, (5-benzyl-3-turyl-methyl-1,2-dimethyl-3-(2-methylpropenyl)-cyclopropanecarboxylate and related compounds.

This insecticide concentrate is effective against a wide range of insects, including house flies, mosquitoes, and other biting insects. It is also effective against many types of beetles, including the common household beetle, the furniture beetle, and the carpet beetle. It is also effective against many types of moths, including the clothes moth and the carpet moth. It is also effective against many types of ants, including the common household ant, the carpenter ant, and the termite.

For control of house flies, mosquitoes, and other biting insects, apply a solution of this insecticide concentrate to the areas where the insects are most likely to be found. For control of beetles, apply a solution of this insecticide concentrate to the base of the furniture, the base of the carpet, and the base of the wall. For control of moths, apply a solution of this insecticide concentrate to the clothes and the carpet. For control of ants, apply a solution of this insecticide concentrate to the areas where the ants are most likely to be found.

For control of the common household beetle, the furniture beetle, and the carpet beetle, apply a solution of this insecticide concentrate to the base of the furniture, the base of the carpet, and the base of the wall. For control of the clothes moth and the carpet moth, apply a solution of this insecticide concentrate to the clothes and the carpet. For control of the common household ant, the carpenter ant, and the termite, apply a solution of this insecticide concentrate to the areas where the ants are most likely to be found.
