The active components of this insecticide concentrate are the new synthetic pyrethrold compounds, tetramethrin and resmethrin. They provide quick knockdown and broad spectrum control.

This concentrate should be diluted with water before use, at a rate of 1 part concentrate to 9 parts water. The diluted spray should be applied in conventional mechanical or compressed air spraying or fogging equipment. It is not recommended for use in thermal generating equipment.

To control roaches, ants, spiders, silverfish, crickets, centipedes, earwigs, sombugs and grain mites: Apply as a coarse droplet spray directed into cracks, crevices and other hiding places along baseboards, around the base of machinery and under pallets. Treat all returned bottle cartons and cases. Spray thoroughly contacting insects directly whenever possi. Spray badly infested areas daily. In other area repeat treatments twice weekly or when reinfestation occurs.

To control flies, mosquitoes, gnats and small flying moths: Close doors and windows and shut off ventilating systems. Apply as a fog or fine mist directing the spray toward the upper portions of the room and towards windows and other light sources which attract these insects. Thoroughly fill the area with mist using ½ to 1 ounce per 1000 cubic feet of space. Keep area closed for at least 10 minutes. Vacate after treatment and ventilate before reoccupying. Repeat treatment as needed.

ON ORNAMENIAL PLANTS: To control aphids, twopotted spider mites and adult white flies on ornamental house and garden plants lafrican violet,
azalea, Christmas cherry, chrysanthemum, cinerarla, diffenbachla, fuschia, gloxinla, Ivy, lantana, Neanth hella palm, petunia, rose and snapdragon and on outdoor plants such as azalea,
chrysanthemum, euonymus, Ivy, marigold, petunia,
rose, snapdragon and zinnial. Apply as a fog or
fine mist, spraying plants with a sweeping motion so that the mist drifts into the plants.
Direct spray so that the upper and lower portions
of leaves are contacted. Use caution on new
growth and tender foliage. When using outdoors,
spray when air is still. Repeat as necessary.

To control tent caterpillers, canker worms, garden web worms, and the above pests on ornamental crabapple, cherries and plum trees spray as above. Do not spray bearing fruit trees.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
