

[4816-471]

DIRECTIONS

Do not use this product in food processing establishments until it is confined to time periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

SPACE SPRAY: For rapid control of houseflies, fruit flies, mosquitoes, flying moths and gnats. Close doors and windows and shut off ventilating systems. Apply using a good sprayer adjusted to deliver a fine mist. Direct spray toward the upper portions of the enclosure, filling the room with mist. Use 1 to 3 ounces per 1000 cubic feet of space.

To kill exposed stages of roaches, ants, spiders, clover mites, cheese mites, confused flour beetles, saw-toothed grain beetles, red flour beetles, rice weevils, granary weevils, and grain mites. Treat as above using 2 to 3 ounces per 1000 cubic feet of space. Keep area closed for at least 15 minutes. Ventilate treated area and ventilate before reoccupying. Repeat treatment when reinfestation occurs.

SURFACE SPRAY: To insure maximum control of the crawling insects noted above, apply as a coarse mist directed toward insects, into cracks and crevices, along baseboards around the base of machinery, containers of stored products and other areas where insects may hide. Spray ant trails, nests and points of entry. Spray badly infested areas daily. In other areas, repeat treatment twice weekly or when reinfestation occurs.

CAUTION: Hazardous wall to wall. Avoid contamination of food and feedstuffs.
