FOR CONTROL OF PESTS AROUND THE HOME

FLYING INSECTS (Flies, Mosquitoes, Gnats and Moths): Direct spray at insects using short bursts (1 to 2 seconds) or treat unoccupied areas as follows: Close doors and windows. With a sweeping motion, direct spray upward to all parts of the room (8 to 10 seconds per 1000 cubic feet). Keep room closed for 15 minutes and ventilate before reoccupying. Do not remain in treated areas.

CRAWLING PESTS (Ants, Boxelder Bugs, Crickets, Earwigs and Sowbugs): Spray into cracks or woodwork, walls, floors and other hiding and breeding places. Direct spray to contact pests when possible. Spray ant trails and areas around door sills and window frames.

WASPS and HORNETS: Direct spray at these insects using short bursts. Spray thoroughly into nests, hiding and breeding places when insects have settled at night.

FOR CONTROL OF PESTS ON ORNAMENTAL PLANTS

For control of aphids, two-spotted spider mites and adult white flies on ornamental house and greenhouse plants (African violets, aralias, Christmas cherries, chrysanthemums, cinerarias, diffenbachias, fuschias, gloxinias, ivy, lantanas, Meanthe bella palms, petunias, roses and snapdragons); and on outdoor plants (azaleas, chrysanthemums, euonymus, ivy, marigolds, petunias, roses, snapdragons and zinnias). Spray plants with a slow sweeping motion so that mist drifts into plants. Direct spray so that upper and lower leaf surfaces are contacted. Use caution on new growth and tender foliage. Repeat as necessary. When using outdoors, spray when air is still.

For control of these pests as well as tent caterpillars, canker worms and garden webworms on ornamental crabapples, cherries and plum trees, spray as above. Do not spray bearing fruit trees.
