DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING.

Apply using a good sprayer adjusted to deliver a fine mist.

INDOORS: For control of house flies, mosquitoes and gnats.

Close all doors and windows. Direct the spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

INDOORS: For control of cockroaches, earwigs, grain mites, sowbugs, spiders and centipedes.

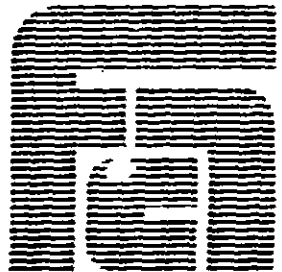

Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes, under refrigerators, baseboards and storage areas. Spray directly on insects where possible. Repeat as necessary.

Ants: Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

To kill fleas on dogs, cats and premises:

Apply directly to animals along back, under forelegs and on other areas except genitalia. Part hair to contact skin and insure good coverage. Hold nozzle about one foot away while spraying. Apply until animal hair is thoroughly saturated. Do not spray directly in eyes or mouth of animal. Repeat within 24 hours of first treatment if necessary. To reduce reinfestation thoroughly spray the animal's bedding and other resting areas until the surface is slightly moist. Also spray the entire inside surface of dog houses. Repeat as necessary, thoroughly spraying floors, cracks, crevices and bedding. Hit as many insects directly as possible.

OUTDOORS: To kill mosquitoes, gnats, (bridges), house flies, biting flies and flying moths (millers).

Follow precautions listed above. Apply the spray 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion while moving away from the treated area. To reduce annoyance from these flying insects, treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

OUTDOORS: To protect ornamental plants Apply using a good sprayer adjusted to deliver a fine mist, spraying plants from 18 to 24 inches.

ORNAMENTALS	INSECTS
Smaller Rhododendrons	Mimosa Webworm Larvae
Pines	Viburnum (on mimosa)
Spruce	Euonymus Aphids
Hemlock	Oaks Exposed Thrips
