Pyrenone®
M.A.G.C. 12.5-2.5

For use by trained personnel only.

Indoors or outdoors for indoor purposes only. For use in areas where conventional cleaning methods are not effective. This product is also effective in controlling stored insects when the applicator follows the directions for use.

INDOOR USE AREAS

- Basements
- Entrance Foyers
- Bathrooms
- Clothes Drying Rooms
- Lounges
- Day Care Facilities
- Gymnasiums
- Homes
- Offices

OUTDOOR USE AREAS

- Garages
- Patios
- Barns
- Feedlots
- Outdoor Areas
- Zoos

ACTIVE INGREDIENTS

- Pyrenone
- Pyrethrum
- Petroleum Ether

KEEP OUT OF REACH OF CHILDREN

See rear panel for additional precautions.

FAIRFIELD AMERICAN CORPORATION
238 WILSON AVENUE
NEWARK, N.J. 07105
Insecticide products should be destroyed, fumigated or treated by other effective methods using an approved product intended for this purpose. As noted above, a dose of 1.25 pounds of Pyrene M A G C 12 5-2 5 first by directing spray into cracks and crevices, corners, under pallets, and around structures of harvested goods—hit the entire structure as possible and then apply as a space spray at a rate of 1.25 ounces per 1000 cubic feet of room space. Repeat applications are necessary for insect control. Leave the treated area closed for one hour. Do not remain in the treated area and ventilate before reentry.

INDOOR USE: DILUTED

SPACE SPRAY APPLICATION: For use in mechanical fogging or spraying equipment.

To control accessible stages of:

- Ants
- Mosquitoes
- Small Flear Moths
- Spiders
- Small Flear Moths

Cover or remove exposed food and cover food handling surfaces in edible product areas. Close and seal all entry and exit points of structures and rooms and shut off electrical equipment. Mix 6 ounces of Pyrene M A G C 12 5-2 5 with sufficient oil to equal one gallon of diluted spray. Apply with a sprayer at the rate of 1.25 ounces per 1000 cubic feet, filling the room with a thick mist. For use in total fogging equipment, use 5 ounces of Pyrene M A G C 12 5-2 5 with sufficient oil to equal one gallon of diluted spray. For best results, use truck mounted equipment and apply when there is a drift of approximately 5 minutes per hour from the spray nozzle. Spray down from the highest point where insects can be seen or heard, then spray up, perpendicularly, along the walls and ceilings to a height of 12 feet. Spray walls, ceilings, moldings, screening, doorknobs, window frames, light fixtures, and similar resting places. Repeat treatment as needed.

TREATMENT OF STORED GRAIN

To control accessible adult stages of:

- Indian Meal Moths
- Indian Meal Moths

Apply to the surface of dried grain at a rate of 1 gallon per 1000 square feet. Apply at monthly intervals until all appearance of moths and continue until early fall. In severe infestations, use this treatment before spraying and make a second application in two weeks.

TREATMENT OF FLYING INSECTS' RESTING PLACES

- For Indian Meal Moths
- Small Flear Moths

Treat walls, ceilings, moldings, screening, doorknobs, window frames, light fixtures, and similar resting places with the above dilution of 1.25-2 5.

OUTDOOR APPLICATION, DILUTED

To control:

- Mosquitoes
- Flear Flies
- Grubs

Apply the above dilution at two ounces per adult bee or wasp; for beneficial insects, apply the dilute spray to thoroughly wet the hair. For other beneficial insects, apply the dilute spray at a rate of two ounces per animal and repeat every 1 to 2 weeks as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed sources even though treatment is not intended for use in such areas. Pesticide Storage and Spill Procedures: Store in tightly closed containers at a temperature 5°C to 27°C (41°F to 81°F) (DO NOT FREEZE). Keep out of the reach of children. Discard all waste according to state and local regulations.

Disposal: Do not contaminate water, food or feed sources or contaminate feed or food in any manner.

Handwashing: Wash hands and face after handling and before eating or drinking.

Environmental Hazards: This product is non-toxic to fish. Do not contaminate water sources. This product is toxic to bees. Apply only when bees are not likely to be present in the area being treated.

Precautionary Statements

HAZARDS TO HUMANS & DOMESTIC ANIMALS

Safe use of this product will not result in any degree of illness, cancer, birth defects, genetic or other harm. Do not handle or pour on plants, trees, shrubs, or flowers. When using insecticides, follow all directions and precautions on the label. Do not contaminate water sources. Do not contaminate food or feed sources. Do not contaminate plants, trees, shrubs, or flowers. For food and feed in the immediate area of application, remove. Do not contaminate water, food or feed sources.

STATEMENT OF PRACTICAL TREATMENT

For use by trained personnel. Contact Center. Follow all directions and precautions on the label. Ensure proper ventilation. Do not apply in the presence of children. Do not apply in direct sunlight. Do not use on plants, trees, shrubs, or flowers. Do not apply to water bodies. Do not contaminate water bodies. Do not contaminate water bodies.

Environmental Hazards:

This product is non-toxic to fish. Do not contaminate water sources. This product is toxic to bees. Apply only when bees are not likely to be present in the area being treated.

For food and feed in the immediate area of application, remove. Do not contaminate water sources. Do not contaminate food or feed sources. Do not contaminate plants, trees, shrubs, or flowers. Do not apply in the presence of children. Do not apply in direct sunlight. Do not use on plants, trees, shrubs, or flowers. Do not apply to water bodies. Do not contaminate water bodies.
