## CONTACT SPRAY:

Kills and Reduces Infestation of Cockroaches, Crickets, Silverfish and Gnats.

Apply as a contact spray. Fill the spray tank with insecticide. Keep spray nozzle about 6 to 12 inches from surface to be treated. Adjust pressure and nozzle to deliver a coarse wet spray. When possible, spray directly on pests to reduce infestations. Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators and other appliances, baseboards, and storage areas. Apply spray until area is moist, but not to the point of run-off. Spray directly on insects where possible. Repeat as necessary.

**Ants:** To kill ants, spray trails, nests and points of entry within buildings and homes. Spray on ants where possible. Repeat as necessary.

**Fleas:** Aids in the control of fleas on pet bedding. Hold spray nozzle about 18 inches from areas to be treated. Apply spray until area is moist. Treat pet bedding the same way. Also spray entire inside surface of dog houses. Repeat as necessary. Do not allow pets to contact treated areas until spray has dried. Remove or cover animal feed before spraying. Also, treat dogs, cats, and horses with a registered flea control product before they re-enter the treated area.

## STORAGE AND DISPOSAL

Store at temperatures above 32°F. Do not reuse empty container. Wrap container and put in trash collection.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.
