

AUG 1 1991

Mr. Jan Brill
Fairfield American Corporation
809 Harrison Street
Frenchtown, NJ 08825

Dear Mr. Jan Brill:

Subject: Label revision-precautionary statements
Multi-purpose Pyrenone Insecticide Concentrate
EPA Registration Number 4186-442
Pyrenone E.C. 10-1 Insecticide
EPA Registration Number 4816-451
Pyrenone Mosquito Capsules
EPA Registration Number 4816-630
Submissions dated July 19, 1991

The amendments referred to above, revising the PRECAUTIONARY STATEMENTS section, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, are acceptable. A stamped copy of the product label for each of the pesticides cited above is enclosed for your records.

The amendments referred to above are acceptable on the condition that the review of the toxicology data submitted for the identical product 4816-462, dated May 10, 1991, are acceptable to support Toxicity Categories IV for acute oral, acute dermal, acute inhalation, and primary skin irritation, and Toxicity Category III/IV for primary eye irritation.

registered under EPA Reg. No.
4816-630

*Equivalent to 8.0% (butylcarbityl) (6-propylpiperonyl) ether and 2.0% related compounds

†Contains Petroleum Distillate

PYRENONE - Registered Trademark of Fairfield American Corporation

Pyrenone® Mosquito Capsules are so designed that they will dissolve or disintegrate when they are placed or thrown. Once action starts the especially formulated solution can "shoot" across the surface of the water in all directions. This surface action will continue until the water surface is completely covered. In small ponds, artificial containers, etc., only a few capsules are required for effective coverage.

If the water is cool (70°F or lower) the initial discharge of the capsules will require from 5 to 40 minutes. Each capsule should cover 100 square feet of open and unobstructed water surface with a depth of 6-inch depth. Proportionately more capsules should be used in shallow areas and greater depth. Allowance has been made for wind blowing, retaining, at times, a portion of the solution. In many cases this is advantageous since it provides for additional "containing" of the solution.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

Avoid contact with skin, eyes and clothing. Prolonged or repeated skin contact may cause allergic reactions in some individuals. If contact occurs, flush eyes or skin with plenty of water. Get medical attention if irritation persists. Wash hands after using. If swallowed: call physician. Do not induce vomiting.

See side panel for additional precautions

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Areas of use include such mosquito breeding habitats as stagnant pools, road and irrigation ditches, catch basins, artificial containers, lake shore lines, dairy wash lagoons, quarries and marshy areas.
