PROPOXUR 1.5 E.C.

EPA Reg. No. 4816-673

EPA Est. No. 279-NY-1

ONLY FOR SALE TO, USE AND STORAGE BY QUALIFIED PEST CONTROL OPERATORS, COMMERCIAL APPLICATORS AND OTHER SERVICE PERSONS

Remains residual for weeks.

For use in and around homes, apartment buildings, hotels, motels, stores, warehouses, food processing plants, restaurants and animal research facilities PROPOXUR 1.5 E.C. provides excellent control of major household pests. especially cockroaches, spiders, crickets, wasp's and normety. This chemical is especially valuable as a roach/control it provides good flushing action of cockroaches, rapid knockdown and long residual control of these and the other insects

Propoxur 15 E.C. has been tested on a variety of inaternals, including wood-(painted and unpainted), plaster, wallhoard, tile (asphall, cerainic, viny) and rubber). It was found to give long residual control on all these surfaces and is non-staining on a wide variety of materials which are not succeptible to watermarking alone

ACTIVE INGREDIENTS:

16.20% 2-(1-Methylethoxy) phenol methylcarbamate 'INERT INGREDIENTS: 83.80%

*Contains Aromatic Petroleum Derivative Solvent

KEEP OUT OF REACH OF CHILDREN

DANGER

See back panel for further precautionary statements.

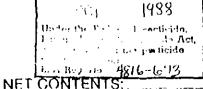

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its tabeling

Propoxur 15 E.C. gives excellent control of ants, cockroaches, clover miles, crickets, earwigs affect (outdoors), mosquitoes (outdoors), Illes, hornets, millipedes, saw-időlhed grad heeijd (exposed stages), scorpions, silverlish, sowbugs, spiders brown dog ticks, wasps, waterbugs, lawn chinch bugs, sod webworms (lawn moths), bilibugs, punkles and sand files. It provides good Pushing action of cockroaches, rapid knockrown and long residual control of these and other insects. Propoxiti 1.5 E.C. will also control strains of cockronchessand mosquitoes exists and ocertain charmaged hydrocarbon and organolyhosphate piseculoides. Prophytir 1.5 E.C. maek (ealily vill) walds. and D

may be applied with most types of hand or power operated sprayers. Agillate spray mixture frequently

Proposition 1.5 E.C. gives rapid Cockdown and effective control of mosquitoes when applied by either ground hist-spraying, or with conventional aircraft spray equipment

Since this is a water-suspension material, do not apply to rugs, carpets. draperies, wallpaper or similar materials that may be stained or watermarked. The solvents of this formulation may stain certain plastic, rubber and asphalt materials, such as tiles and floor coverings. Do not treat such materials without Itrst testing a small inconspicuous area. Do not use as a space spray. Provide adequate ventilation of area being treated. Do not apply to animals or humans. Do not use on food crops. Do not use on plants other loan those recommended. Do not use in animal barns or poultry houses for fly control. INDOOR USES:

Pest Control In and Around Homes, Apartment Buildings, Hotels, Motels, Stores and Warehouses: For residual control of ants, cockroaches, millipedes, silverlish, spiders, waterbugs and to ald in control of saw-toothed grain beetle (exposed stage) mix 8 fluid ounces (% pint) of concentrate in 1 gation of water* (1.1% concentration) and apply as a residual spray to baseboards, window frames, the undersides of shelves and drawers, under sinks and stoves and to other places where insects may hide. Also spray cracks, crevices and surfaces where insects may crawl when they come out of hiding. For ants, spray trails and places where ants enter premises. Repeat as necessary. Do not spray loodstuffs or house plants. Do not allow children to contact treated surfaces until surfaces are completely dry.

Pest Control in Meat Packing and Food Processing Plants, Food Storage Areas, Restaurants and Other Food Handling Establishments (places other than private residences in which exposed lood is held, processed, prepared or .≱erved)..>

For residual control of ants, cockroaches, millipedes, silverlish, spiders, waterbugs and to aid in control of saw-toothed grain beetle (exposed stage). mix 8 (luid ounce) (% pint) of concentrate in 1 gation of water (1.1% Concentration).

Non-Food Alens Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, moniclosets and storage (after canning or bottling).

Apply to haseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, Jables, pallets and almilar areas where insects hide or through which they may enter.

FOOD ATE IS LIMITED, TO CRACK AND CREVICE TREATMENT ONLY - Apply a small amount of material as a pin-thin stream directly into cracks and crevices auch as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, or hollow equipment legs, where the insects noted above hide. Do not use this product in conduits, motor hounthus and electribal switch boxes.

Care should be taken to avoid depositing the product onto exposed surfaces, or Introducing the material into the dir. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED!

Spraying unloading docks and obtaige areas where insects congregate will aid in preventing re-intestations. Good paritation and proper disposal of wastes is essential in any effective Insect control program.

PEST CONTROL IN ANIMAL RESEARCH FACILITIES. Follow the above directions. The use of this product in and around research animals' quarters for pest control will not induce changes in liver microsomal enzyme activity in these animals. Propoxur 1.5 E.C. should NOT be applied in portions of the buildings where there is direct contact by the animals. Do not treat animals Treat animals with an E.P.A. approved product registered for use on animals.

FAIRFIEL AMERICA

201 Rt 17 Nor Rutherford NJ 07070

OUTDOOR USES:

For residual control of insects around industrial buildings, hotels, motels, homes, garbage areas, dumps, sewer manholes and for mosquito control in non-crop areas.

Residual Spray for ants, cockroaches, earwigs, flies, hornets, millipedes, mosquitoes, spiders, crickets, clover mites, fleas, scorpions, sowbugs, brown dog ticks, wasps and waterbugs. Mix 8 fluid ounces (½ pint) of concentrate in 1 gallon of water* (1.1% concentration) and apply as a residual spray or with a paint brush to surface of buildings, porches, screens, window frames, patios and garages where these insects congregate. For control of wasps and hornets, apply at dusk when all of the insects have returned to the nest. Repeat as necessary. Do not treat plants (lawns, flowering plants, shrubs, trees, etc.) with this concentration. Do not spray more than 3 gallons per sewer manhole.

To control sand flies or punkies (Culicoides spp.) mix 8 fluid ounces (% plnt) of concentrate in 1 quart of water* (4.5% concentration) and apply with paint brush to outside surfaces of door and window screens and other screened areas where insects may enter buildings. Thorough coverage is necessary for maximum control.

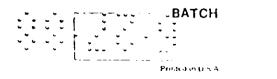

Ground Mist Syray for Mosquitoes: Apply 4% to 6 fluid ounces (0.05 to 0.07 lbs. active) per acre. For mist-blower machines calibrated to deliver 100 gallons per hour traveling at a speed of 4 m.p.h. and covering a swath width of up to 350 feel, use 5% to 8 gallons of spray concentrate per 100 gallons of water* to treat 170 acres. IMPORTANT: Do not allow to drift or use on crop or pasture lands.

NOTE: Due to the high volatility of the solvents in this concentrate, it is necessary to add the formulation directly to the aircraft spray tank and mix well with water. Do not premix in nurse tanks. Aircraft tanks must be closed after mixing to prevent solvent evaporation, which would result in crystallization of the active ingredient. Prepared spray should not be held in tank longer than 2 to 3 hours.

Pest control of Lawns and Turf

Sod webworms (lawn moths): To control sod webworms on lawns and turf, mix 11 fluid ounces (approximately 1½ cups) of concentrate in 10 to 15 galions of water' and apply to 1000 square feet of area. For best results, mow the lawn and rake dead grass from damaged spots. Water the lawn thoroughly and allow grass to dry before spraying. If possible, do not water again for several days. Three applications at monthly intervals may be required for maximum control. In most areas, the first application should be made in May or June. Consult your local State Agricultural Experiment Station or Extension Service for more specific information regarding timing of applications.

Chinch bugs and hunting billbugs: Apply 16 fluid ounces (1 pint) of concentrate per 1000 sq. ft. of lawn or turf area. Do not use less than 15 gallons of water* per 1000 sq. ft. For best results use 30 to 40 gallons of water per 1000 sq. ft. Repeat as necessary. For effective control of chinch bugs apply during the apring and summer months, creas recommended by your State Agricultural Experiment Station of Cextending the service of the station of the control of the station of the control of the station of the service of the station of the s

PRECAUTIONARY NOTE: The feeding on treated areas may be killed. Keep children and pets off treated areas until dry.

*The use of this material in water at 40°F or below may result in crystallization in the spray tank. Do not use in oil. Do not allow spray mixture to stand overnight in the spray tank.

MIXING CHART:

Fluid ounces of Propoxur 1.5 E.C.

Concentration Required	1 Gallon U.S.	3 Gallons U.S.	10 Gallons U.S.
1.1%	8 (½ pint)	24 (1½ pints)	80 (5 pints)
4.5%	32 (2 pints)	96 (6 pints)	320 (20 pints)

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE AND SPILL PROCEDURES: Store at room temperature. Keep away from direct sunlight, radiators, stoves and other heat. Do not store near leed or food products. Do not store below 32°F. Material will freeze and may result in a burst can Product may be reconstituted by agitation and warming to 70°F. In case of spill or leakage, soak up with an absorbent material such as sand, sawdust, earth, fuller's earth, etc. Dispose of with chemical waste

PESTICIDE DISPOSAL: Pesticides, spray mixture or rinse water that cannot be used according to label instructions must be disposed of at or by an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap container in several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS . HAZARDS TO HUMANS & DOMESTIC ANIMALS DANGER

Causes eye Irritation. May be fatal if swallowed, inhaled or absorbed through skin. Do not get in eyes, on skin or clothing. In case of profonged exposure, wear natural rubber gloves, protective clothing and goggles. Do not store near feed or food products. Do not contaminate food. Wash hands, arms and face thoroughly with soap and water after handling and before eating or smoking. Wash all contaminated clothing with soap and hot water before rouse.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Contact a physician or Poison Control Center immediately. Vomiting should be induced. Administer milk or water freely and induce vomiting by giving one dose (% oz. or 15 mt) of syrup of ipecac. If vomiting does not occur within 10 to 20 minutes, administer second dose. If syrup of ipecac is not available, induce vomiting by sticking linger down throat Repeat until vomit fluid is clear. Never give anything by mouth to an unconscious person.

IF ON SKIN: Wash affected area immediately with soap and warm water. If irritation persists, contact a physician

IF IN EYES: Flush eyes with plenty of water. Contact a physician if irritation persists.

IF INHALED: Remove affected person to fresh air. Apply artificial respiration if indicated

NOTE TO PHYSICIAN - Atropine sulfate is antidotal.

ENVIRONMENTAL HAZARDS

This product is toxic to birds, shrimp, crabs and other wildlife. Do not apply directly to takes, streams, ponds, tidal marshes or estuaries. Do not apply where runoff is likely to occur. Do not apply when weather conditions layor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.
