 Johnson Forward Cleaner™
 Cleans the dirt, kills the germs and leaves the shine

What Johnson Forward Cleaner is ...

Johnson Forward Cleaner is a silicate-buffered, non-ionic synthetic detergent. The Forward formulation is an exclusive (i.e., a unique blend of ingredients) ... all balanced, coordinated and working together ... teamed for top efficiency and effectiveness on floors, walls, ceilings, equipment - any nonporous washable surface.

Controlled-Action Forward unleashes ...

- o Full-range cleaning power - cleans as well as a harsh caustic.
- o Full-range cleaning power - necessary to remove all kinds of dirt - even dirt locked in by grease or soap scum.
- o Full-range cleaning power - gets things clean not only on routine jobs, but on problem jobs as well ... jobs that are beyond the range of most "neutral" cleaners.

Johnson Forward Cleaner is not harmful to floors or painted surfaces when used according to directions. Johnson Forward Cleaner contains biodegradable detergents.

Johnson Forward Cleaner is an effective germicide and disinfectant ... contains 760 ppm of a potent quaternary germicide which is effective against a wide spectrum of micro organisms. This formulation has passed the A.O.A.C. Use Dilution Test for germicides against Staphylococcus aureus and Salmonella choleraesuis. Johnson Forward Cleaner is recommended for use in nursing homes, schools and colleges, veterinary clinics, animal life science laboratories, federally inspected meat and poultry establishments and households for disinfecting precleaned hard, non-porous inanimate surfaces.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

General use directions for disinfecting:

For use on hard nonporous surfaces such as floors, walls, metal surfaces, porcelain and plastic surfaces. Remove gross filth and heavy soil deposits. Preclean all surfaces prior to disinfection; then thoroughly wet surfaces as recommended and required. Use a 1:16 dilution (8 oz. per gallon of water) for a minimum contact time of 10 minutes in a single application. Can be applied by a mop, sponge or cloth as well as spraying or soaking. The recommended use solution is prepared fresh for each use and then discarded. Rinsing is not necessary unless floors are to be waxed or polished.

For use in federally inspected meat and poultry plants as a floor and wall cleaner in all departments. Before using Johnson Forward Cleaner, food products and packaging materials must be removed from the room or carefully protected. After use of this compound, all surfaces in the area must be thoroughly rinsed with potable water.

For most soils on most surfaces:

Mix a 1:40 dilution (1 cup to 2-1/2 gallons of water). For light cleaning, weaken the solution down to 1:128 dilution (1 oz. per gallon of water). Then use as any good cleaner is used. Rinse and let dry. For extra heavy soil, strengthen the solution (up to a 1:20 or 1:15 dilution).

Johnson Forward Cleaner cleans well in cold water, but the use of hot water will increase its effectiveness.

Johnson Forward Cleaner cleans and significantly reduces bacterial counts. Johnson Forward Cleaner is a germicide at 1:20 dilution (2 cups to 2-1/2 gallons hot or cold water).

Kills HIV-1 (AIDS virus) on precleaned environmental surfaces/objects previously soiled with blood/body fluids in settings mentioned in this brochure in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 (AIDS VIRUS) OF SURFACES/OBJECTS SOILED WITH BODY FLUIDS.

Personal Protection: Disposable latex or vinyl gloves, gowns, face masks, or eye coverings as appropriate, must be worn during all cleaning of body fluids, blood, and decontamination procedures.

Cleaning Procedures: Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of Johnson Forward Cleaner.

Contact Time: Effective against HIV-1 (AIDS virus) on hard non-porous surfaces when used at a 1:40 dilution for a contact time of thirty (30) seconds at room temperature. Use a ten (10) minute contact time for disinfection against all of the other organisms claimed on the label.

Disposal of Infectious Materials: Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals.

Avoid contact of undiluted product with skin or eyes. In case of contact immediately flush eye or skin with plenty of water. Get medical attention if irritation persists. Avoid contamination of food. Keep out of reach of children.

4 4

STATEMENT OF PRACTICAL TREATMENT

In case of contact immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

STORAGE AND DISPOSAL

Prohibitions

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

Pesticide disposal

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

Plastic containers

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Metal containers

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

General

Consult, federal, state, or local disposal authorities for approved alternative procedures such as limited open burning.
