INSECT SPRAY

CAUTION: COMBUSTIBLE MIXTURE NYCFD C. of A. No. 270
Do not use or store near heat or open flame. Do not smoke while spraying.

DIRECTIONS

For best results use a good, clean sprayer - free of rust - which produces a fine mist.

For Flying Insects, Flies, Mosquitoes, Flying Moths, Gnats, Wasps: Close doors and windows. Spray freely towards ceiling in all directions until room is fogged with mist. When spraying, keep about three feet from interior walls, fabrics, and furniture. Door and windows may be opened after 10 minutes.

For Crawling Insects, Roaches, Waterbugs, Silverfish, Crickets: Spray thoroughly into cracks and crevices, under and behind sinks, cupboards, drawers, woodwork, refrigerators, pipes and drains where these insects hide. Spray directly on as many insects as possible. Repeat application as necessary.

Moths and Carpet Beetles: Raid Insect Spray kills these insects, their eggs and larvae by contact. Clean and spray closet articles. Repeat application every 30 days. Where carpets are infested, spray both sides thoroughly. When spraying near fabrics, keep spray in constant motion at least 36 inches away from the fabric. Spraying closer may cause stains.

Bedbugs: Spray baseboards, molding, floor boards. Spray mattresses particularly around seams and tufts. Take beds apart and spray into all joints. Repeat application as necessary.

Ants: Spray trails, hills, around window sills and openings around pipes and baseboards where ants crawl, hitting as many as possible. Repeat application as necessary.

Fleas: Spray floors, floor coverings and sleeping quarters of pets and other infested areas. Repeat as required. Do not spray pets.

Outdoor Use: To repel temporarily many annoying insects on porch, terrace, and at outdoor gatherings, spray frequently around chairs, tables, floors, ground, and surrounding air.

JOHNSON'S
RAID
INSECT SPRAY

3/5

DESCRIPTION

This RAID INSECT SPRAY has two big PLUS features:

1. Its Power-Packed Formula!
2. It kills even RESISTANT roaches and flies!
Contains no DDT.

It is a fast acting space spray with highly effective knock-down power, especially made for use in institutions...in restaurants, hotels, motels and other commercial establishments...in food and dairy plants, in-plant restaurants and cafeterias and other industrial locations... and in schools and colleges.

This RAID INSECT SPRAY quickly kills many flying insects in spray mist including flies, mosquitoes, wasps, flying moths, and gnats. Wetting by direct spraying kills many crawling insects including roaches, ants, silverfish, fleas and bedbugs.

At one-half strength, this Power-Packed Formula of RAID INSECT SPRAY complies with U.S. Department of Commerce Commercial Standard CS72-54 for Grade AA Household Fly Spray.

IMPORTANT - USE AS DIRECTED. See directions on opposite side panel.

CAUTIONS: Harmful if swallowed. Keep out of reach of children. Avoid direct spraying of foodstuffs, dishes, utensils. Do not use on humans, pets or plants. Cover bird cages and fish bowls before using spray. Keep spray in constant motion at least 36 inches away from walls, fabrics, furniture, floors, plastics, etc. Spraying closer may cause stains. Most asphalt tile, some linoleum and certain plastic materials have a tendency to discolor and soften when wet with petroleum base insecticides. Before spraying, test such materials by applying to small inconspicuous areas.

Use in food processing plants only when plant is not in operation. Food should be removed or protected during treatment. All food processing surfaces should be covered or thoroughly cleaned before again using for food.

NOT FOR USE ON PLANTS. For garden pests, use RAID aerosol House and Garden Bug Killer.
