Johnson
GO
GETTER

the
WORKING FOAM
bowl cleaner

NET CONTENTS: 15 FL.OZ.

A PRODUCT OF JOHNSON WAX SERVICE PRODUCTS DIVISION

Johnson GO-GETTER, the Working Foam bowl cleaner, is a better way to clean, disinfect, and deodorize toilet bowls and urinals.

Working Foam. Foam stays put on sides, up under rim. Controlled chemical action cuts rust, scum, stains, encrustations. Just swab GO-GETTER on; let the foam do the work . . . fast.

Go-Getter Swab and Cone-Guard. Exclusive. Foam GO-GETTER onto swab and clean—up under rim . . . along sides of urinal . . . down in bowl. Cone-Guard protects from splashing. Permits wringing swab without touching. Neat. Clean. Easy.

Handiest Package. The Johnson exclusive "Foam-Maker" cartridge turns GO-GETTER liquid into "Working Foam". Screw cartridge cap onto GO-GETTER bottle. Use handy clip to hold GO-GETTER Swab. Now everything you need is in one easy-to-carry unit. No cumbersome caddy.

Johnson GO-GETTER cuts washroom maintenance time. Other advantages: *Economical.* Foaming uses as little as one-third as much material as other methods. *Concentrated.* Foam is full strength—not diluted. Yet even when diluted with bowl water, GO-GETTER cleans effectively. Won't corrode pipes and plumbing under normal conditions. Won't scratch. Can be used in septic tank systems. *Disinfects.* Kills most disease-producing germs normally found on seats, in toilet bowls, in urinals.

WARNING: Contains Hydrogen Chloride. Caustic. May be fatal if swallowed. May produce chemical burns. Do not breathe vapor or fumes. Do not get in eyes, on skin, or on clothing. External Antidote: If skin or eye contact occurs, flood with water. If irritation persists call a physician. Internal Antidote: If swallowed, drink a teaspoon or more of mag-

TO CLEAN AND DISINFECT BOWL

1. Use GO-GETTER Swab to lower water level in bowl by forcing over trap.
2. Press water from swab. The exclusive Cone-Guard makes this easy, neat.
3. Apply foam to swab. Lather bowl under rim, down sides, and in lower bowl level. Let stand 30 seconds or longer as necessary so GO-GETTER can do its work.
4. Flush and swab-rinse the bowl, particularly under rim, at water outlets and in the lower bowl level. Rinse swab and press out water.
5. Apply GO-GETTER to swab and lather seat and cover. Flush toilet. Swab-rinse seat and cover and dry. Rinse swab and press out water with Cone-Guard.

NOTE: Use of a hand mirror is helpful throughout the cleaning operation. Use a mirror before cleaning to check condition of the bowl . . . as cleaning progresses to guide the operation . . . and at the end to be sure there are no misses.

TO CLEAN AND DISINFECT URINAL

1. Apply foam to dry or damp GO-GETTER Swab. Lather in all recesses and along sides, especially around water outlets and at top. Let stand 30 seconds or longer as necessary so the foam can do its work.
2. Swab-rinse urinal being sure GO-GETTER has removed soil, stains, and encrustations especially in recesses, at top, sides and around water outlets.
3. Remove grid and swab inside drain pipe thoroughly with GO-GETTER.
4. Replace grid and flush urinal.

nesia, chalk, small pieces of soap softened with water, or whiting in milk, mucilage or raw egg white. Call a physician. Wipe up spills with baking soda and water solution. Rinse enamelware, chrome, or other metal surfaces after contact. Do not use with cleansers or bleaches.

Active Ingredients: Hydrogen Chloride 14.44%.
Inert Ingredients: 85.56%
