RESIDUAL KILL for ROACHES  
AND  
FAST KILL for FLIES - MOSQUITOES

NON-TOXIC TO HUMANS AND PETS

New STABILIZED PYRETHRIN formula

This is STABILIZED PYRETHRIN -- New from Johnson Wax Research. Pyrethrin's fast knockdown and powerful effectiveness keeps on killing roaches even after it dries instead of fading away in less than a day -- Yet it's all right to spray in the air. POWER GUARD's high-activity mist kills flying insects in the air on contact. POWER GUARD's tracer foam surface spray kills roaches and ants on contact. POWER GUARD's exclusive Stabilized Pyrethrin formula kills and keeps killing roaches -- yet is NON-TOXIC TO HUMANS AND PETS.

DIRECTIONS: SHAKE BEFORE USING. Point actuator opening away from face and push button.

FOR FLYING INSECTS, HOLD CAN UPRIGHT: Flies, mosquitoes, flying moths, gnats, wasps. Close doors and windows and spray up into air with a sweeping motion. Keep about four feet from walls, fabrics, furniture. Keep room closed 10 minutes. Five seconds spraying clears average size room (1000 cu. ft.). Also spray surfaces around light fixtures on porches, in garages, and other places where these insects alight or congregate.

FOR CRAWLING INSECTS, HOLD CAN UPSIDEDOWN: Hold dispenser about 18 inches from surface being sprayed. Spray until surfaces are wet. Exclusive tracer foam shows you where you have sprayed and will disappear when the product dries. Repeat applications as necessary.

Ants: Spray trails, nests, and points of entry. Hit as many bugs as possible. Repeat treatment as required.

Roaches, Waterbugs, Crickets, Silverfish, Centipedes, Scorpions, Spiders, Sowbugs: Spray thoroughly into hiding places such as cracks and crevices, around pipes and baseboards. Hit as many bugs as possible. Spray top and underside of rugs to kill carpet beetles. Repeat as necessary.

Bedbugs: Remove bedding and spray mattress, seams, folds, and other hiding places in bed and room. Repeat spraying as needed. Fleas: Spray floors, floor covering, and sleeping quarters of pets. Repeat spraying as often as necessary.

CAUTIONS:

Never puncture or throw container in fire. Never set container on stove, radiator or place where temperature will exceed 120 F. which may cause it to burst.

ACTIVE INGREDIENTS: Pyrethrins, 0.25%; technical piperonyl butoxide, 1.25% (equivalent to 1.0% of (butylcatbityl)(6-propylpiperonyl) ether and 0.25% related compounds).

INERT INGREDIENTS: 98.50%
