Vaporizing Strip Insecticide

RAID ROOM GUARD

Vaporizing strip insecticide is made from powerful VAPONA[®] insecticide in a special plastic strip. The strip continuously meters out insecticide to kill mosquitoes, flies, and gnats for up to three months. Long-lasting insect control is now automatic.

DIRECTIONS: One strip controls mosquitoes, flies and gnats in spaces up to 1000 cubic feet (8' x 12' x 10'). Additional strips provide greater effectiveness in larger areas when placed about ten feet apart.

1. Cut open the inner protective envelope and remove the ROOM GUARD strip. Avoid contact with textiles or finishes to prevent staining.
2. Assemble the foil holder and insert the strip diagonally into the holder. Close top of the holder.
3. Stand or hang (using the enclosed hook) the holder where room air can freely circulate around it. The strip will instantly begin to release the insecticide vapors.
4. Replace when necessary. This ROOM GUARD strip is designed to work for three months under normal conditions. Excessive ventilation and severe drafts will reduce the effective life of the strip.

5. ROOM GUARD is not designed for instantaneous kill of insects, but by continuous action affecting the insects over a short period of time.

ROOM GUARD also controls small flying insects -- mosquitoes, flies and gnats -- in garages, barns, kennels, and other buildings. Use one strip per 1000 cubic feet of enclosed space. Hang a ROOM GUARD strip in garbage cans for all-season fly control.

CAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not get in mouth; harmful if swallowed. After prolonged storage, a small amount of liquid may form on the strip. Do not get liquid into eyes. Wash hands thoroughly with soap and water after handling strip. Do not contaminate feed, water, and foodstuffs. Do not use in nurseries or rooms where infants, ill or aged persons are confined.
