KILL FLIES, MOSQUITOES, SMALL FLYING MOTHS, AND GNATS
 RAID Professional Strength Flying Insect Killer is most effective when you spray 1 foot from the fly. You can also clear an average size room 2 feet out in 15 minutes, or a smaller room by simply spraying upward with a sweeping movement, keeping about 3 feet from walls, fabrics, and furniture until the room is filled with mist. (4 seconds spray time for 1000 cubic feet.) Keep door and windows closed for about 15 minutes. • Do not remain in treated area. Ventilate the area after treatment is completed.

This product has been tested and proved effective when sprayed directly on Roaches, Waterbugs, Silverfish Crickets, and Ants. TO KILL RACHES, WATERBUGS, SILVERFISH CRICKETS: spray hiding places such as baseboard and floorboard joints. Repeat application around the perimeter of the bed, bookcase, cabinets and other storage areas. • Do not use on silk or wool fabric. Repeat application as necessary.

Always spray the area around window and door and perimeter of carpet, especially where a fly crawls, hitting a many a fly, the best way to get rid of them.

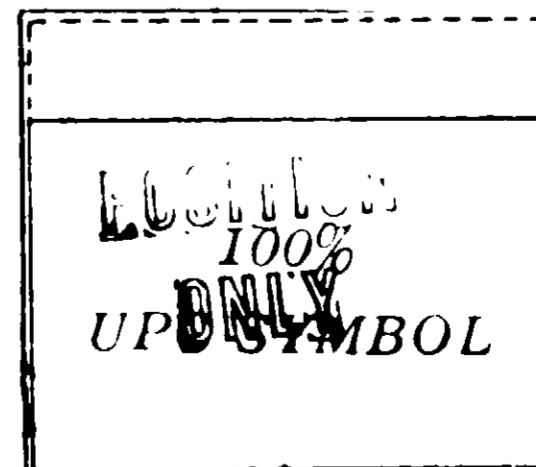

WARNING: Do not use in enclosed areas under pressure. Do not use near fire, sparks, or flame. Do not pour into or near electrical outlets. Explosion temperature above 170 F may cause bursting.

• Avoid use near children and pets. • Do not use on fabrics for removal of stains. • Avoid use on food processing articles. • Do not be used for fly treatment in thoroughly cleaned before use. When used for fly treatment, apply only when the fly is in the open.

Remove pet from area to be treated before spraying.
