TO KILL FLYING INSECTS

FLIES, MOSQUITOES, SMALL FLYING MOTHS, GNATS: With Raid there is no need to spray directly at flying insects — the mist in the air will kill them. Close all doors and windows. WASPS: Spray directly at stray wasps that enter building.

TO KILL CRAWLING INSECTS

ROACHES, WATERBUGS, SILVERFISH, CRICKETS: Spray hiding places such as baseboards and floor boards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets and other storage areas, hitting as many insects as possible. Repeat as necessary.

ANTS: Spray trails, hills, around window frames and openings around pipes and baseboards where ants crawl, hitting as many as possible. Repeat as necessary.

FLEAS: Spray floors, floor coverings and sleeping quarters of pets. Repeat spraying as often as necessary.

SPIEDERS, CENTPEDES, SOW BUGS: Spray webs and places where these pests crawl. Hit as many as possible. Repeat as necessary.

CARPET BEETLES: Hit these bugs directly with spray on sections of floor, baseboards, shelves and underside of carpets. Repeat spraying at frequent intervals.

BEDBUGS: Spray baseboards, moldings, floor board. Spray mattresses, particularly around seams and tufts. Take beds apart and spray into all joints. Repeat spraying at frequent intervals.
