FLYING INSECT KILLER

POWERFUL AGENT - KNOCK OUT FLIES
SO FAST YOU SEE THEM FALL

To SPRAY, remove tab on front of spray cap. Look into hole on top of cap and turn cap until white mark appears. After use, turn cap until white mark disappears.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SHAKE BEFORE USING

To unlock sprayer valve, push down tab inside nozzle and remove it. Always shake can well before spraying. Hold container upright. Point sprayer cap away from face and press button firmly.

TO KILL FLIES, MOSQUITOES, SMALL FLYING MOTHS, AND GNATS: RAID Professional Strength Flying Insect Killer is most effective when you spray directly on flies. You can also clear an average size room (1000 cubic feet) in a matter of minutes, by simply spraying upward with a sweeping movement, keeping about:

3 feet from walls, fabrics, and furniture, until the room is filled with mist. (4 seconds spray time for 1000 cubic feet.) Keep doors and windows closed for about 15 minutes. Do not remain in treated areas. Ventilate the area after treatment is complete.

This product has been tested and proved effective when sprayed directly on Roaches, Waterbugs, Silverfish, Crickets and Ants. TO KILL ROACHES, WATERBUGS, SILVERFISH, CRICKETS: Spray hiding places such as baseboards and floorboards, moist places, openings around sinks, drains and pipes, behind bookcases, cabinets and other storage areas hitting as many insects as possible. Repeat applications as necessary.

DISPOSAL

Do not use empty container. Wrap container and put in trash collection.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Keep out of reach of children. Do not remain in enclosed areas after use. Ventilate enclosed areas before returning. Avoid contamination of food and foodstuffs. Remove pets, birds and cover fish aquariums before spraying.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 120 F. may cause bursting.
