**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Shake well before using**

**FOR SPACE SPRAY APPLICATION:** To obtain fine mist for use as a space spray, unscrew top of nozzle approximately one complete turn. To dispense the product, squeeze trigger firmly. To prime, several pumps may be required before any liquid is dispensed.

**FOR SURFACE SPRAY APPLICATION:** To obtain a coarser spray for surface application, continue rotating the nozzle until desired spray pattern is achieved.

**FOR MAXIMUM SPRAY CONTROL:** To direct spray into tight areas, continue rotating nozzle until product is dispensed as a jet stream.

**TO KILL HOUSE PESTS**

**FLYING INSECTS:** Houseflies, Mosquitoes, Small Flying Moths, Gnats. Adjust sprayer to fine mist for space spray application as described above. Close doors and windows and spray up in the air with a sweeping motion. Keep about three feet away from walls, fabrics and furniture. Fill room with mist. Do not remain in treated area. Keep room closed for at least 15 minutes. Ventilate room when completed.

**WASPS AND HORNETS:** Application should be made in the evening when insects are at rest. Adjust sprayer to jet stream for maximum control and spray liberally into nesting and breeding places. Contact for many insects is as possible. Repeat as necessary. For spray wasps and hornets that enter dwellings, adjust sprayer to coarse spray and spray directly at the insect.

**CRAWLING PESTS:** Roaches, Palmetto Bugs, Waterbugs, Silverfish, Crickets, Sawbugs, Millipedes, Centipedes. Adjust sprayer to coarse spray. Spray thoroughly with working places such as cracks and crevices, under pipes and baseboards, behind bookcases, cabinets, and other storage areas. Contact for many bugs as possible. For maximum control of spray into tight areas, adjust nozzle to jet stream. Repeat as necessary.

**ANTS:** Spray trails, nests around window frames and openings, around pipes and baseboards where ants crawl. Hit as many as possible. Repeat as necessary.

**SPIDER:** Spray nests directly with jet stream. Apply to all areas where infestations occur. Spray until surfaces are wet, particularly around windows, door baseboards and other spaces. Repeat as necessary.

**FLIES:** For house fly infestations, spray thoroughly of bedding, of bedding, of bedding. Spray sweeping quarters, of bedding and baseboards, window, door frame, wall cracks and floors. Repeat as necessary. Do not spray animals. Put fresh bedding in pet quarters after spray has dried. If best results, dog and cat should be treated with a registered flea control product before allowing them to enter the treated areas.
