Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.
100-1025

HOME INSECT KILLER

Residual treatment against insects for the whole home • Kills and controls 17 different pests • Keeps killing for weeks • Water based formula; non-staining; non-damaging to carpets, rugs, floors and baseboards • No strong solvent odor • Use both indoors and out

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION: May be harmful if swallowed or absorbed through the skin. Avoid contact with eyes, skin or clothing. Do not smoke while using. Wash thoroughly after handling. Avoid breathing spray mist or vapors. Keep away from food, feedstuffs and domestic water supplies. Remove pets and cover fish bowls (aerators) before spraying. Do not allow children or pets to contact treated surface until spray has dried. Note to Physician: Atropine by injection is antidotal only. Symptoms of cholinesterase inhibitor are present.

STATEMENT OF PRACTICAL TREATMENT - If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water, and induce vomiting by sticking finger down throat. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

First Aid: Wash thoroughly with soap and water.

If in Eyes: Flush with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SHAKE BEFORE USING - TO USE THE HOSE SPRAYER ATTACHMENT: Remove cap from bottle. Insert sprayer tube into bottle and tighten screw cap. To prime sprayer before use, unscrew top of nozzle two complete turns. Hold sprayer below level of bottle and squeeze trigger firmly about 10-15 times until product is dispensed. If a coarser spray is required, continue to loosen top of nozzle. The sprayer can deliver a wide range of sprays from fine mist for wide area coverage to jet stream for small tight areas. To prevent sprayer from taking during storage, tighten top of nozzle securely.

INDOORS - COCKROACHES, WATERBUGS, FINGERFLIES, SILVERFLY, CRICKETS, EARWIGS, SOBBUGS, CENTIPEDES, MILLIPEDES: Spray until wet in cracks, around baseboards, behind and beneath cabinets, refrigerators, sinks, stoves, around plumbing, and other localized areas infested with insects. Repeat as necessary. Do not spray on brass or copper.

ANTS: Spray until surface is wet, applying to ant trails, around doors and window frames and wherever ants enter the house. Repeat as necessary.

SPIDERS: Spray pests directly wherever possible. Apply to localized areas where infestations occur. Spray until surfaces are wet, particularly around windows, doors, baseboards and crawl spaces. Repeat as necessary.

CARPET BEETLES: Apply along baseboards, edges of carpeting, under furniture, under carpeting and rugs, in closets and behind air conditioning units where infestations occur or are suspected. Spray surfaces until wet. Repeat as necessary.

FLEAS & BROWN DOG TICKS: Apply to infested areas such as pet bedding and resting quarters, around baseboards, door frames and wall cracks. Spray surfaces until wet. Do not soak bedding of pets should be removed and replaced with clean, fresh bedding after spray has been allowed to dry. Do not spray directly on animal. Repeat as necessary. For best results, pets should be treated with a flea control product registered for animal application to control the source of the infestation.

OUTDOORS - FLIES, MOSQUITOES, SMALL FLYING MOTHS: For outdoor use only to aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter. Spray around light fixtures on porches, in garages and other places where these insects are known to alight or congregate.

FLEAS & BROWN DOG TICKS: For treatment of localized infestations of these insects in outdoor areas where there are weeds or brush, non-crop areas, spray infested areas thoroughly. Repeat applications as infestations warrant and as re-infestations occur.

ANTS: Thoroughly wet hill and run ways. Repeat applications as infestations warrant and as reinfestations occur.

MOUND DRENCH FOR FIRE ANTS: Dilute 1 quart (16 fl. oz.) Raid Professional Strength Home Insect Killer per 2 gallons of water. Using a sprinkler can apply 2 gallons of solution as a gentle rain to each fire ant mound. Thoroughly wet mound and surrounding area to a 4 ft. diameter (12 sq. ft.). Treatment is most effective during cool weather (65-80 F) or in the early morning or late evening hours. Treat all mounds in the vicinity and treat new mounds as they appear. Do not use pressurized spray equipment for application of this product. This may disturb the ants, causing migration away from the treated area, thus reducing product effectiveness.

For multiple mound treatments, larger quantities of solution may be required. Application at the rate of 2 gallons per mound is required.

DISPOSAL: Do not reuse container or sprayer for any other purpose. Wrap container and put in trash collection.
