Penetrates Deep To Kill More Bugs Dead

Raid® Fumigator Fumigating Fogger creates a deep-penetrating, fumigating smoke that flushes bugs out from where they hide and kills them on contact. When activated, it fumigates the whole room with a dry, white cloud of smoke. The fumigating smoke stays in the air during the 3-hour treatment, penetrating deep, filling cracks and crevices and going way under furniture and appliances to kill bugs where they hide. That's why it kills so many bugs!

Raid® Fumigator Fumigating Fogger can be used in kitchens, living areas, garages, attics, basements and pet areas. One unit treats a room of up to 16' x 20'. For best results, keep treated rooms closed for 3 hours after treatment.

• Relieves infestations • Drives bugs out and kills on contact • Convenient—easy to use • Delayed fogging allows time to leave room • No oily residue on surfaces • Fresh scent • No stains
