Racine, WI 53403-2236

Attn: Kelly K. Rahn
Registration Specialist

Subject: Johnson Wax Glade Air Sanitizer and Deodorizer
EPA Registration No. 4822-293
Amendment Dated October 12, 2000

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, to gain approval of the proposed labeling and two (2) alternate formulations, is acceptable provided that you:

1. Delete the claims "Strawberries and Cream" and "Vanilla Mint". These claims are misleading and not permitted because they may imply that this is a food grade product that may be used on food to add flavoring.
2. Delete the claim "Cinnamon Sticks". This claim is misleading and may imply that it is a food grade product that may be used in food.
3. Submit two (2) copies of final printed labeling before you release the product for shipment bearing the amended labeling.

The proposed two alternate Confidential Statements of Formula dated October 9, 2000. (formula #27590 and Formula #27592) are in compliance with 40 CFR, Part 158.175. agree with the label and both CSFs are acceptable.

The Certified limits for the active and inert ingredients are in compliance with 40 CFR, Part 158.175 and are acceptable.

[BACK LABEL:]

TEMPORARILY REDUCES GERMS IN THE AIR

FRESH, CLEAN SCENT

KILLS 99.9% OF AIRBORNE HOUSEHOLD BACTERIA

Kills 99.9% of odor-causing germs (bacteria) (in the air)

ANTIMICROBIAL

Johnson Wax Glade Air Sanitizer and Deodorizer helps reduce the number of airborne bacteria in any room.

Johnson Wax Glade Air Sanitizer and Deodorizer makes your home a fresher place to be.

Leaves (Makes) your home (air) smell(ing) (clean) (and fresh) (and pleasant).

Sanitizes the air

Works quickly (to eliminate odors)(at their source). Eliminates Odors (caused by bacteria)(at their source).

Eliminates tough odors such as pet, smoke and mildew(at their source).

Odor Elimination (Eliminator)

Cleans your air (of) (from)(bacteria)(germs)(odors)(at their source).

To activate unit: see Automatic dispenser instructions on back of box.

For use in (Hospitals) (Nursing Homes) (Schools) (Factories) (Offices) (Hotels) (Public Buildings) (Retail Stores) (Theaters) (Boats) (Campers) (Homes) (and) (Automobiles):

Sanitizes, deodorizes and freshens the air. Temporarily reduces the number of airborne bacteria. The dispenser automatically actuates the special metered valve every fifteen minutes, treating the air against odors and providing effective air sanitization.

DIRECTIONS FOR USE.

It is a violation of the Federal law to use this product in a manner inconsistent with its labeling.

TO TEMPORARILY REDUCE AIRBORNE BACTERIA And eliminate odors in an average room (12' x 12' x 9'), close all doors, windows and air vents and spray product upward in center of room for 10 seconds.

For maximum effectiveness relative humidity should be between 45% and 70%. Resume normal room ventilation after spray has settled.

TO DEODORIZE ONLY, spray into the air as needed.

AUTOMATIC DISPENSER OPERATION:

1. Open the front door of the unit. Place thumb in front arrow on the right side of the front door and press firmly. Pull front door open to reveal air sanitizer can.
2. Keep aerosol can pointed away from your face. Do not spray in eyes.
3. "ON/OFF" switch is located inside the dispenser, just above the air sanitizer can. Turn switch to "ON", again while pointed away from face and eyes. Dispenser should release a measured amount of spray approximately 5 seconds after turning the unit "on" and then every 15 minutes for the next 3 weeks.
4. Close the front door.

5. Dispenser should be placed on a flat surface and directed where air flow will carry the air sanitizer spray throughout the room. Keep pointed away from face and eyes.

To Temporarily Reduce the Number of Airborne Bacteria: A measured amount of product will spray into the room at intervals to temporarily reduce the number of airborne bacteria. Within 24 hours of continued use, the air sanitizer will prove to be effective in temporarily reducing odor-causing bacteria. One unit should be installed for each average sized room (12' x 12' x 9'). Close all doors and windows. Spray should be directed where flow will carry the particles through out the closed area. Factors such as air current, temperature, humidity, and conformation of treated area govern number of units required for effective control.

For smoke and odor control: Automatic dispenser will spray automatically at regular intervals. If possible, remove the source of odor.

Storage and Disposal Statements

STORAGE: Store away from heat, sparks and open flame, in an area inaccessible to children. **DISPOSAL:** This container may be recycled in the few but growing number of communities where aerosol can recycling is available. Before offering for recycling, empty the can by using the product according to the label. (DO NOT PUNCTURE) recycling is not available, wrap the container and discard in trash.
