Subject: Revised Labeling--Additional Label Claim
Raid Ant Controller
EPA Registration Number 4822-335
Your Application Dated September 22, 1994

Dear Mr. McArthur:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, is acceptable provided that you make the labeling change indicated below before you release the product for shipment bearing the amended labeling:

Delete references to killing "for three long months."
Please refer to the Agency letter dated January 29, 1992.
We have no record of any additional data or explanation submitted to resolve the objections stated in that letter.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

DHE

Dennis H. Edwards, Jr.

Child Resistant Bait Discs

New Raid® Ant Controller is a totally different way to kill ants dead. It works continuously, 24 hours a day, seven days a week to rid your home of ants. Ants carry the powerful bait back to the nest to kill the queen and the entire colony. Ant Controller kills a variety of household ants, including Black Carpenter Ants, Argentine Ants, Cornfield Ants, and Pharaoh Ants. Ant Controller discs can be placed anywhere you have seen ants; even next to food and dishes. Raid®, America's most trusted bug killer, guarantees Ant Controller works or your money back.

Directions for Household Use:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Remove discs from tray, place both thumbs on the label of the bait and push out.
2. For best results, place the discs by ant trails or close to areas where ants are numerous. You can even place Raid® Ant Controller discs on kitchen counter tops and next to food and dishes.
3. Use all four discs at one time; use additional discs for larger infestations. Replace all discs every three months to keep ants from returning. Use the three month reminder on the discs or on your calendar to indicate the date of replacement.

For Outdoor Use: Place baits where ants are seen. Where possible, place baits alongside ant trails, directly on ant nests, in cracks & crevices on door and window sills, or wherever ants are seen entering the building. For best results, place baits every 6-9 feet around the perimeter of the building.
