Dear Ms. Fugate:

Subject: Snake II
EPA Reg No. 4822-501
Submission dated 3/22/02

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. One copy of the finished labeling must be submitted prior to releasing the product for shipment.

As noted in the letter to SC Johnson dated 7/6/01, you must add an Environmental Hazards statement as follows:

This pesticide is highly toxic to fish. Do not apply directly to water. Drift from treated areas may be hazardous to organisms in adjacent aquatic sites. Do not contaminate water when disposing of equipment washwaters.

You must provide instructions for disposal of partially used or unused coils as set forth in PR Notice 2001-6. The directions for use include the following instruction: "extinguish by pressing the glowing end inside the pot. The unused portion can then be relit when needed." In addition, the marketing claims clearly show that purchasers will be buying coils in multiple units. Therefore it does not meet the test set forth in the memo dated 12/12/01.

Clarify or correct on page 4 the term "sot."

If you have questions, please call Ann Sibold at 703 305-6502.

Sincerely,

Ann Sibold
