- RECREATION ROOMS

mg/kM

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Break baits apart from the plastic frame before placement.

Place bait stations by ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place bait stations on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur.

Do not use residual sprays with or near Raid® Double Control Ant Baits. Ants will begin to feed—population reduction and less activity can be expected in about a week.

For Effective Control: Use 3-4 bait stations for the average size room. Use 6-8 bait stations for heavy infestations. Bait stations are designed to be visually inspected with a flashlight. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption). Raid Double Control Ant Baits are packaged in a child resistant container.

STORAGE AND DISPOSAL STATEMENTS

STORAGE: Store in a cool, dry area inaccessible to children.

DISPOSAL: Wrap container and put in trash collection.

Manufactured for S.C. Johnson & Son, Inc.
