AND TOXIC SUBSTANCES

APR 9 2002

Mr. Stuart McArthur
S.C. Johnson & Son, Inc.
1525 Howe St.
Racine, WI 53403

Subject: Amendment Updating Disposal Instructions per PR Notice 2001-6
Raid Double Control Ant Baits
EPA Reg. No. 4822-508
Your Submission Dated February 14, 2002

Dear Mr. McArthur:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comment below. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

1. Under "Hospitals and Related Institutions and Facilities" on the last page, delete the phrase "in contact" from the first sentence. The revised sentence should read: "Do not place baits where they will come into direct contact with patients or contaminate sterile areas or instruments."

If you have any questions regarding this action, please contact Susan Stanton of my team at (703) 305-5218.

Sincerely,

A handwritten signature in cursive script that reads "Susan L. Stanton for".

(BACK PANEL)

RAID DOUBLE CONTROL ANT BAITS

For Commercial, industrial and Residential Use
Including Food Processing Plants, Eating Establishments, Food
Marketing-Storage-Distribution, Hospitals, Nursing Homes, Schools, Office
Buildings, Apartments, Laundries, Buses, Aircraft, Museums and Zoos

Ants are attracted to the bait in Raid Double Control Ant Baits. The food is carried back to the nest to kill the queen and destroys the entire colony.

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Break (baits) (bait stations) (Raid Double Control Ant Baits) apart from the plastic frame before placement.

Place (baits) (bait stations) (Raid Double Control Ant Baits) by ant trails or close to areas where ants are present, even on food preparation surfaces or next to food. Do not place (baits) (bait stations) (Raid Double Control Ant Baits) on food preparation surfaces when food is being handled or on utensils that are used for food preparation. Also place adjacent to walls, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings and wall voids or anywhere ant problems occur. (To apply (baits) (bait stations) (Raid Double Control Ant Baits) to vertical surfaces, use the enclosed stickers.)

Do not use residual sprays with or near (baits) (bait stations) (Raid Double Control Ant Baits).

Ants will begin to feed -- population reduction and less activity can be expected in about a week.

For effective control:

Use 3-4 (baits) (bait stations) (Raid Double Control Ant Baits) for the average size room.

Use more (6-8) for heavy infestations.

(Baits) (Bait stations) (Raid Double Control Ant Baits) are designed to be visually inspected with a flashlight. This allows for monitoring and timely replacement. Replacement is recommended after 3 months or when bait is almost entirely consumed (do not risk loss of control by allowing complete consumption).

(Baits) (Bait stations) (Raid Double Control Ant Baits) are packed in a Child Resistant Container.

STORAGE AND DISPOSAL STATEMENTS

STORAGE: Store in a cool, dry area inaccessible to children.

DISPOSAL: Before disposing, empty the container by using the product according to the label. Do not reuse this container. Place in the trash or offer for recycling if available.

If partially filled: Call your local solid waste agency or 1-800-558-5252 for disposal instructions.

Never place unused product down any indoor or outdoor drain.
