LABEL REVISION
NOTIFICATION

Dear Ms. Hobgood:

Re: RAID EO ARK, EPA Reg. No. 4822-534
Notification of Packaging-Related Claims and Directions

This is to notify the Agency that we wish to add a graphic and related text advising the consumer to "Twist and snap off tab before spraying." I am attaching a copy of the text label with this sentence added, as well as a copy of the final printed label (for the alternate brand name, "Raid Earth Options Wasp & Hornet Killer") for your reference and records. I believe this change is related solely to packaging and involves no changes to dosage, concentration, frequency or method of application, or exposure. This product is not a rodenticide or bait, and does not require CR packaging. Therefore I believe this notification is appropriate under Section 2. E. of PR Notice 98-10.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

If you have any questions concerning this submission or if there is any further information I may provide, please call me at 262-260-2405.

Thanks very much.

Sincerely,

Stuart McArthur

FRONT, SIDE, OR BACK PANELS:

EPA Reg. No. 4822-

EPA Est. No.

Net Contents: 12 – 17.5 oz.

Storage & Disposal

Storage: Store in a cool, dry area away from heat or open flame.

Disposal: Do Not Puncture or Incinerate! If empty: Place in trash or offer for recycling if available. If partially filled: Call your solid waste agency or 1-800-529-3394 for disposal instructions. Never place unused product down any indoor or outdoor drain.

Precautionary Statements

Hazards to Humans and Domestic Animals

Caution: Harmful if swallowed, inhaled, or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, and clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. Prolonged or repeated contact with the skin may cause allergic reactions in some individuals.

[If the product is directed for use outdoors]

Environmental Hazards: Do not apply directly to water.

Physical or Chemical Hazards: Extremely flammable. Contents under pressure. Keep away from heat, sparks, and open flame. Do not use this product on electrical equipment. Do not puncture or incinerate container. Exposure to temperatures above 130° may cause bursting.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

If Swallowed: Call a doctor or get medical attention. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Avoid alcohol.

If on Skin: Wash with plenty of soap and water. Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake well before using. Hold container upright and aim nozzle away from face. Press button firmly to spray.

For Wasps, Hornets, and Yellow Jackets: For best results, apply in the early morning or evening when (insect activity is minimal)(insects are at rest). Stand at a safe distance from the nest and not directly underneath. Hold can upright and point spray opening toward nest with wind at your back. Spray liberally until nest is thoroughly (saturated)(wet). Contact as many insects as possible.

For Tent Caterpillars: Apply when caterpillars are young and tents are first noticed. For best results apply in late afternoon or evening when caterpillars have returned to their tent. Aim spray directly at tent and apply until saturated.
