EPA Reg. No. 4822-548  
Notification to remove use sites

Dear Mr. Swindell:

I have enclosed the paperwork necessary to provide notification that "hospitals" and "nursing homes" have been removed from the master label for this product. While this can normally be done via non-notification, I wanted to make a formal submission as currently this product has been flagged for ATP testing. The product is for residential use and, based on this submission, can be removed from the list of products that need to be tested in 2010. This is the only change that has been made to the enclosed label.

**As this action is a notification, a PRIA fee is not required.**

As always, thank you for your assistance with this submission and don't hesitate to contact me should the need arise.

Sincerely,
