b. On page 4, the product label claims "Foaming Action." Please confirm that the product "foams" after it is applied, or provide efficacy data to demonstrate that the product is effective when applied as foam using appropriate equipment.

c. The proposed label indicates that the product may be used on fiberglass [see pages 6 and 8 of the proposed label]. This is a porous surface. Delete this general reference or indicate on the product label that the product may be used on specific fiberglass surfaces such as fiberglass bathtubs.

d. The proposed label includes the word "New" under general marketing claims [see page 2 of the proposed label]. The word "New" may be included on the label only for a period of six months following Agency approval of the product label.

e. The following marketing claim [on page 4 of the proposed label] must be revised, as there are too many optional words: "(Contains -or- Leaves) no (harsh) (harmful) (lingering) chemicals."

f. The directions for using the product to deodorize [see page 9 of the proposed label] are in brackets. The brackets must be removed. In accordance with DIS/TSS-16, adequate dosage recommendations and complete directions for use of a product as a deodorizer must be provided on the label.

g. The proposed label depicts three sets of "icons" that are to be used in connection with certain fragrance names [see page 12 of the proposed label]. These "icons" include an orange, lime, and lemon. Label descriptions of the product fragrance include "citrus," "lemon," "lime," and "orange." According to information on the Application for Pesticide, the product will not be packaged in child resistant packaging. Graphics depicting fruit not be included on the label in accordance with information contained in a letter from EPA to the Consumer Specialty Products Association (dated November 13, 2002), indicating that product labels depicting fruit pose concerns for children's safety (see <http://www.epa.gov/oppad001/fruitgraphic.htm>).

\*The species designation of this organism has recently been changed by the American Type Culture Collection. The currently accepted name is *Salmonella enterica*. This change is effective immediately, and the new name should be used in all references to this organism in the future.

h. List the ATCC number for each organisms on the label.

3. It is understood that product chemistry studies GRNs 830.6317 (storage stability) and 830.6320 (corrosion characteristics) will be submitted within one-year from the date of this notice.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Adam Heyward
