TO KILL FLYING INSECTS:

INDOORS:

FLIES, MOSQUITOES, SMALL FLYING MOTHS, NON-BITING (FUNGUS) GNATS, FRUITFLIES:

[1] (With H7A-US) there is no need to spray directly at flying insects - the mist in the air will kill them. Close all doors and windows. Spray RAID up into the air with a sweeping motion, keeping about 3 feet (36" (inches)) (1 meter) from interior walls, fabrics and furniture, until the room is thoroughly misted. Do not remain in treated area. Keep treated room closed for at least 15 minutes following application. Thoroughly ventilate room before re-entry.

[2] (With H7A-US) there is no need to spray directly at flying insects - the mist in the air will kill them. Close all doors and windows. For the average size room (10ft x 12ft x 8ft) (1000 cubic feet) (30 cubic meters) spray in a slow sweeping motion for 8 to 10 seconds starting from the middle of the room and backing toward the door, directing the spray to all areas of the room. Keep spray about 3 feet (36" (inches)) (1 meter) from interior walls, fabrics and furniture. Do not remain in treated area. Keep treated room closed for at least 15 minutes following application. Thoroughly ventilate room before re-entry.

[either [1] or [2] will be on the product label, not both]

For fast knockdown, spray directly at insects, keeping about 3 feet (36" (inches)) (1 meter) from interior walls, fabrics, and furniture.

In kitchens, be sure to treat areas that may attract these insects such as around windows, sinks and garbage cans.

Spray directly on stray WASPS, HORNETS, YELLOW JACKETS and ASIAN LADY BEETLES that enter building.

For residual control of listed insects, spray screens and around doors and windows where insects enter the house from a distance of about 18" (inches) (1/2 meter). Also, spray screens and doorways on patios. It is recommended to check for potential staining and damage in an inconspicuous place before complete treatment.

**For residual control of mosquitoes during the night:** treat the room at the rate of 8 seconds of spray per 1000 cubic feet (30 cubic meters). Close doors and windows, spray in a slight upward direction covering all areas of the room, staying about 3 feet (36" (inches)) (1 meter) from walls, fabrics and furniture. After spraying close the door as you leave the room. Keep doors and windows closed for at least 15 minutes following application. Thoroughly ventilate room before re-entry. Doors and windows may then be reopened.

OUTDOORS:

FLIES, MOSQUITOES, SMALL FLYING MOTHS, ASIAN LADY BEETLES, NON-BITING (FUNGUS) GNATS, FRUITFLIES, BOXELDER BUGS:

If a slight breeze is blowing, spray with the wind, allowing the spray to drift over the target area staying at least 3 feet (36" (inches)) (1 meter) from plants and bushes. Allow a couple of minutes for product to take effect. Give special attention to breeding areas such as garbage cans and compost piles. Treat these areas from a distance of about 18" (inches) (1/2 meter) when possible. When spraying in garages be careful that spray does not contact painted surfaces of vehicles.
