Ms. Rachel M. Callies
S.C. Johnson & Sons, Inc.
1525 Howe Street
Racine, WI 53403

Subject: Label Amendment
Peduncle BS
EPA Registration Number: 4822-597
Application Date: August 12, 2013
Decision: 481964

Dear Ms. Callies:

The label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

If you have any questions, please contact Melody Banks on 703 305-5413 or via E-mail @ banks.melody@epa.gov.

Sincerely,

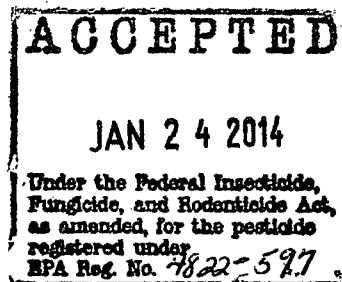

A handwritten signature in black ink, appearing to read "Richard Gebken".

Richard Gebken
Insecticide Branch
Product Manager
Registration Division (7504P)

Enclosure: Stamped Accepted Copy of Product Label

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Side (Back) (Inside) (Panel) for Additional Precautionary Statements (and Directions for Use)

For use in residential areas only

Net Contents:

[Reviewer Information]
(Optional Text)

Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General Information:

(Test in an inconspicuous area before applying.) Do not allow product to come into contact with children or pets until dry. Apply to clean, dry surfaces. Do not apply to surfaces that come in (direct) contact with food. Apply to surfaces only as a spot and crack and crevice treatment. Remove pets and birds and cover aquariums. Do not use in commercial food handling establishments, restaurants, or other places where food is commercially prepared, processed, served or stored. Do not use on dogs or cats. (Wash hands after use.)

To Use:

Remove cap
[or]

To remove cap, depress tab(s) (press and release tab(s)) (lift tab) (and remove cap) (flip cap back) (and) (pull) (remove) (slide) (move) (in direction of arrow) (by unscrewing in a) (counter-clockwise) (clockwise) (direction)

To begin using, press (push) pad (applicator) (sponge) down (on a flat surface,) pumping (x times) (with pumping motion) until applicator is wet (and release) (then reduce pressure). [x will be a number]

Slide (Move) applicator in a continuous line (to create a line (zone) of bug defense (bug control)).

Re-wet applicator as needed (as described above) to create a solid (continuous) line.

For wall (or overhead) application, Re-wet applicator as needed (as described above) (, then apply).

(Reapply after cleaning (or washing) a treated surface, but not more than once a week.)

(Replace cap when done.)

(Wash hands after use.)

Indoors

Ants, (Boxelder Bugs), Centipedes, Cockroaches (Including Adult and Immature Stages Of Both Non-Resistant And Organophosphate And Carbamate Resistant Strains), Crickets, (Dermestids), (Firebrats), (Ground Beetles), (Palmetto Bugs), (Pillbugs), Scorpions, (Silverfish), (Sowbugs), ((Brown Marmorated) Stink Bugs), (and) (Waterbugs): Apply as a spot and crack and crevice treatment to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases, and similar areas. Care should be taken not to come into contact with food handling surfaces. Cover or remove all food and cooking utensils or wash thoroughly after treatment. Exposed food should be covered or removed. Repeat as necessary but not more than once per week.

Carpenter Ants: Locate nests and treat surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Apply to infested wood through existing openings.

Ticks [(Including Deer Ticks Which May Carry Lyme Disease)] and Fleas on Surfaces: Remove pet bedding and destroy or clean thoroughly. Apply to pet resting quarters. Put fresh bedding down once area has dried. Do not apply to animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Do not allow pets to contact treated surfaces until dry. Treat rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use.

Spiders: Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Flying Insects- Houseflies, Gnats, Mosquitoes and Small Flying Moths: Apply to localized resting areas, such as inside surfaces of window and door frames, surfaces around light fixtures and cords, railings, etc. and anywhere these insects may rest. Insects coming to rest on treated surfaces will be killed.

Pantry Pests - Grain Beetles (Rusty, Merchant and Saw-Toothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elmleaf Beetles, Rice Weevils, Lesser Grain Borers, Spider Beetles and Tobacco Moths: Treat exposed stages. Remove all food-stuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow to dry prior to replacement of shelf paper, food and utensils. Wash any exposed food handling surfaces and utensils before use.

Carpet Beetles (Black, Furniture and Varied): Apply to and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

Webbing Clothes Moths: Use this product as a crack and crevice treatment in closets and other storage areas where these pests are found. This is an adjunct treatment and will not control moth larvae already on clothes. Do not apply to clothing.

Bedbugs and Lice: Wash linens, blankets and bed covers in hot water and dry using the high heat setting before reuse. Apply to mattress tufts, folds and edges. Apply to the interior of the frame. Allow to dry before contacting or remaking bed.

Outdoors

Remove all exposed food and cooking utensils from around grills and tables. Cover all food handling surfaces or wash thoroughly after treatment and before use. Do not use on edible crops. Do not make applications during rain. Do not water the treated area to the point of run-off. All outdoor applications must be limited to spot or crack-and-crevice treatments to building foundations up to a maximum height of 3 feet, and structural surfaces (such as windows, doors and eaves) only. Application is prohibited directly into sewers or drains or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. Do not contaminate fish ponds or apply directly to water.

Pests on Outside Surfaces of Buildings- Ants, Clover Mites, Crickets and Sowbugs (Pillbugs): Apply to foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply to outside surfaces of buildings where insects tend to congregate, including screens, window frames, eaves, porches, patios and garages. Repeat treatment as necessary, but not more than once per week.

Crawling Insects- Ants, Cockroaches (including Asian Cockroaches), Centipedes, Crickets, Mole Crickets, Waterbugs and Silverfish. Treat infested surface of patio or picnic areas, including legs of tables and chairs, as a spot or crack and crevice treatment.

Ants: Apply around ant trails and hills. Apply around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and apply on and around debris. Repeat as necessary but not more than once per week.

Flying Insect- Houseflies, Gnats, Mosquitoes and Small Flying Moths: Apply to outside surfaces of window and door frames and other areas where these pests may enter the home. Also apply to localized resting areas, such as under eaves, porches, surfaces around light fixtures and cords, railings, etc. where these insects may rest. Insects coming to rest on treated surfaces will be killed.

Carpenter Ants and Carpenter Bees: (for localized control only) Apply to voids or channels in damaged wood of a structure, or to cracks, crevices and spaces in and between wooden portions of a structure or between wood and the foundation, in locations vulnerable to attack such as crawl spaces.

House Plants- Aphids, Japanese Beetles, Lace Bugs, Leafminers, Mealy Bugs, Mites and Spider Mites on house plants. Apply to upper and lower surfaces of foliage. Avoid wetting blossoms if possible. Repeat applications as necessary but not more than once per week. Not for use on plants grown for sale or other commercial use.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION:

Contact with product may result in transient tingling and reddening of the skin. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

Environmental Hazards

This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

Physical or Chemical Hazards

Do not apply this product in or on electrical equipment due to possibility of shock hazard.

5 7 11

STORAGE and DISPOSAL

STORAGE: Store in a cool, dry area inaccessible to children and pets and away from heat, sparks and open flame. Protect from freezing. If freezing occurs, allow product to thaw and shake well before using. Some product separation may occur on freezing which is reversible on shaking. Freezing does not adversely affect the performance of this product.

DISPOSAL: Non-refillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partially filled: Call your local solid waste agency or 1-800-529-3394 for disposal instructions. Never place unused product down any indoor or outdoor drain.

Questions? Comments? Call 800-558-5252 or Write Helen Johnson.

(Use this product ([brand name])) to help keep ants (bugs) out of your home.

Use this product ([brand name]) in hard-to-reach places where control is needed.

For hard-to-reach places (where control is needed).

(Use this product ([brand name]) to) help(s) keep fleas (ticks) (spiders) (cockroaches) (roaches) (ants) (and other listed bugs) out of your home.

Controls Ticks That May Carry Lyme Disease

Up to 12-month control of (protection from) German Cockroaches (roaches) on non-porous surfaces

Season long control of (protection from) German Cockroaches (roaches) on non-porous surfaces

The easy way to apply year-long (season-long) protection from German Cockroaches (roaches) on non-porous surfaces

The effortless way to apply year-long (season-long) protection from German Cockroaches (roaches) on non-porous surfaces

The quick way to apply year-long (season long) protection from German Cockroaches (roaches) on non-porous surfaces

Use this product ([brand name]) to help keep German Cockroaches (roaches) out of your home (for up to 12 months) on non-porous surfaces

Keeps Killing Flies For Up To 5 Months (20 Weeks) on non-porous surfaces

Works for (all) season long on German Cockroaches (roaches) Roaches when applied to non-porous surfaces

Keeps killing Carpenter ants for up to 1 months (4 weeks) when applied to non-porous surfaces

Keeps Killing Pharaoh Ants, Crazy Ants and Fire Ants For Up To 1 Week on non-porous surfaces

Treats up to [X] doors (and [X] windows) on average

[number of windows and doors to be based on size of product sold and average perimeter length of doors and windows found in the US]

Treats up to [X] feet

[length will be based on size of product sold]

Controls (Kills) (Keeps Killing) German Cockroaches (roaches) for up to 12 months on non-porous surfaces

Controls (Kills) (Keeps Killing) Flies for up to 5 months (20 weeks) on non-porous surfaces

Controls (Kills) (Keeps Killing) Pharaoh Ants (Crazy Ants) (Fire Ants) for 1 week on non-porous surfaces

Controls (Kills) (Keeps Killing) Carpenter Ants for 1 month (30 days) when applied to non-porous surfaces

Tips for best results (Best Practices): Cockroaches (roaches) (Insects) like damp, dark places. To help make this product more effective (To maintain control) use this product in combination with other general cleaning (and maintenance) (such as cleaning, sweeping, dish washing, vacuuming and mopping. Do not leave dirty dishes in sink and seal food in tight fitting containers. Caulk and seal cracks and crevices (openings) where insects enter home.

For Use (May Be Used) On House Plants

For doors and windows (and) around (behind) sinks, (cracks and crevices), (cabinets), (entry points), (floorboards) (and) (molding)

Apply in an area where you need (want) a targeted (controlled) application.

Apply in and around cracks and crevices of exterior (and interior) doors, window frames, baseboards, around the sink and back splash (behind sink) (and other places where insects enter the house (home)).

Apply indoors in areas where you want a targeted (controlled) treatment (application),

(~~around (under) the sinks~~)
 (~~around the backsplashes~~)
 (~~in sliding glass door tracks~~)
 (~~at entry points~~)
 (~~on sills~~)
 (~~in openings where insects come in~~)
 (~~around pipes and vents~~)
 (in hiding places (corners))
 (around toilets)
 (around-dishwasher)
 (around garbage cans)
 (behind (under) stove)
 (behind (under) refrigerator)
 (behind (under) dishwasher)
 (basements)
 (laundry areas)
 (garages)
 And
 (storage areas).

This product ([brand name]) is to be used in and around residences and their immediate surroundings:

(apartments)
 (attics)
 (basements)
 (bathrooms)
 (cabins)
 (campers)
 (carports)
 (condominiums)
 (decks)
 (dens)
 (garages)
 (gazebos)
 (homes)
 (kitchens)
 (living rooms)
 (patios)
 (play rooms)
 (porches)
 (recreational vehicles)

- (rooms)
- (storage areas)
- (sun rooms)
- (utility rooms)
- and
- (verandas).

Use this product ([brand name]) in hard-to-reach places
 Apply around doors, windows, kitchen backsplashes, cracks, crevices and floorboards to help keep listed bugs out.

~~[Non-Chemical Control Options: one or more to be chosen from the following list]~~
 (Additional) Tips (Non-chemical Control Options): [one or more to be chosen from the following list]:
 Seal (Caulk) points where roaches enter or escape into wall voids, crack and crevices.
 Caulk any points where bugs enter into wall voids, cracks and crevices, including entry points from outside or neighboring units.
 Remove food spills and exposed food.
 Store food in sealable (sealed) containers.
 Avoid leaving (accumulating) dirty dishes in sinks.
 Keep food out of bedrooms and living rooms.
 Caulk hiding spots and points of entry (from outside or neighboring units).
~~Avoid the use of organic mulches next to the foundations. This is a great place for roaches (ants) (bugs) to nest and to gain entry into the home.~~
 Avoid the use of mulch next to the foundation, which provides an ideal place for outdoor ants to nest and to gain entry into the home.

~~Do not store items like wood near the home. They are great areas where roaches (ants) (bugs) live and breed.~~

Do not store items like firewood near the home, which provides areas for outdoor roaches to live and breed.

De-clutter outdoor areas to remove hiding places close to the home (debris, stones, piled wood, loose bark or mulch).

Do not leave doors and windows open.

Inspect screens for holes and loose edges that may allow insects (bugs) to enter.

[spiders]

Spiders:

Remove as many insect sources as possible that act as the primary diet of spiders.

[bed bugs]

Bud bugs:

The key to solving a bed bug problem is early detection. Be watchful for signs of an infestation like skin bites or small spots of blood on sheets or pillow cases.

After mattress treatment, purchase a high quality mattress encasement so that mattress does not need to be retreated.

Before treatment, wash linens, bed covers and curtains using hot water; dry items using high heat setting.

Store treated or uninfested items in sealed plastic bags to avoid a future infestation.

Clean and vacuum well before treatment, to remove as many bugs as possible.

Stay vigilant: repeat applications may be needed over the next two months.

[fleas and ticks]

Fleas and Ticks:

At the time of room and/or pet treatment, wash all pet bedding to remove existing fleas and eggs.

Shampoo pets regularly with a flea shampoo.

Vacuum rugs, carpets and upholstery thoroughly to remove eggs and larvae. Pay particular attention to areas where pets rest. Be sure to empty the bag and dispose of it properly so those fleas and eggs do not re-infest.
