# ABFEX

**KILLS FLIES, MOSQUITOES, GNATS, ROACHES, ANTS, WATERBUGS, SILVERFISH, FLEAS, BEDBUGS, CLOTHES MOTHS, AND CERTAIN OTHER INSECTS**

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**STORAGE AND DISPOSAL**

**STORAGE:** Do not contaminate water, food or feed by storage or disposal. Do not store, pour, or spray near fire or flame.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

1. To kill flies, mosquitoes and gnats: Close doors and windows directing the spray up toward the ceiling. The room should be filled with mist and remain closed for 10-15 minutes. Sweep up dead or stupefied insects and destroy them. Repeat treatment as often as necessary.

2. To kill roaches, waterbugs and silverfish: Spray liberally around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in moulding and woodwork, pipe openings in walls and floors or wherever these insects are likely to hide. Repeat treatment as often as necessary.

3. To kill ants: Use the spray so as to wet as many insects as possible, paying particular attention to nests, runways, ant trails, door sills, and window frames. Repeat treatment as often as necessary.

4. To kill bedbugs: Bedsteads should be sprayed thoroughly in all corners, cracks and crevices. Springs and mattresses should be sprayed thoroughly after the bed is dismantled, paying particular attention to cracks, crevices, tufts and seams on mattresses, wall-paper and any place where the bugs may hide. Repeat treatment as often as necessary.

5. To kill clothes moths and carpet beetles: Take special precautions to see that cracks are thoroughly wetted with spray liquid. Wool lint and organic matter accumulating in these places will serve as breeding materials for such pests. Clothing to be stored should be cleaned and aired and sprayed carefully from a distance of one to two feet, taking care to see that seams and folds are wetted. Chests in which woollens are to be stored should be thoroughly sprayed before filling with clothes. Closets should be sprayed liberally at least twice a month, directing the spray on the garments. For control of carpet beetles, thoroughly spray along baseboards, edges of carpeting, under furniture, under carpeting, rugs and shelves or wherever these insects are suspected.

6. To kill fleas: Liberally spray all infested places--rugs and under rugs, basements, under porches and wherever pet animals make their bed. Spray bedding of household pets. Do NOT spray animals directly. Repeat as required.

7. May be used in schools, motels, hotels, nursing homes, industrial plants, office buildings, most other institutions or anywhere necessary for the control of the insects listed on this label.

8. This product is intended for use in Federally inspected Meat, Poultry Processing and Food Processing Plants. This product may be used in places where edible products are handled, provided exposed edible products are removed or covered before spraying is begun, and the premises are cleaned by thorough washing after spraying is completed. Apply only when the plant is not in operation.

9. CAUTION: **Dangerful or fatal if swallowed.** Do not induce vomiting if taken internally. **Call a Physician immediately** when used in an enclosed area, do not remain in the room and ventilate the area after treatment is completed. Remove pets, birds and fish bowls before spraying.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material other than use and/or handling in conformity with label instructions.
