MANUFACTURING CHEMISTS
VICON
EMULSION BOWL CLEANER
 Disinfectant, Deodorant, Sanitizer

Active Ingredients: Hydrogen Chloride	23.29%
Orthodichlorobenzene	2.50%
Inert Ingredients	74.21%

 **Danger - Corrosive** 
Poison
 Contains Muriatic Acid
May be Fatal if Swallowed
KEEP OUT OF REACH OF CHILDREN
 (See antidote statement and additional precautions on back panel)

VICON — easily removes rust, stains, discolorations, scum, scale, and filth from toilet bowls, urinals, and all vitreous ware.

- 1. Disinfection of Toilet Bowls and Urinals** — Saturate a bowl mop or bowl brush with 10-11 ounces Vicon. Brush or swab the inside and under side surface of the flush ring where most odors from uric acid incrustations are found. Allow Vicon to remain on surface for a few seconds — then flush toilet. Surfaces should now be sparkling clean. Inspect by using a small mirror to reflect those areas you cannot see by looking at surface directly.
- 2. Cleaning Toilet Bowls** — For mere cleaning of bowl without disinfecting, reduce quantities shown in paragraph 1 above to ½-1 ounce Vicon. If not completely clean, repeat application. After thorough cleaning, bowl can be kept clean by daily pouring a few ounces of Vicon into toilet, rubbing it over all surfaces and flushing with water.
- 3. Cleaning Urinals** — Saturate bowl mop or brush with ½-1 ounce Vicon. Clean exterior and interior of urinals thoroughly. After several minutes — flush. Urinal should now be sparkling.
- 4. Hard Surfaced Floors** — such as stone, marble or ceramic tile can be cleaned with Vicon. Use approximately 1 ounce per gallon of water. Do not use on resilient floors such as asphalt tile or rubber tile, etc.

 **Danger - Corrosive** 
Poison

KEEP OUT OF REACH OF CHILDREN

Corrosive — May be fatal if swallowed.
 Produces chemical burns.
 Do not breathe vapor or fumes.
 Do not get in eyes, on skin, or on clothing.
 Rinse empty container thoroughly with water and discard it.

ANTIDOTE — Call Physician immediately.

INTERNAL — Drink a teaspoonful or more of magnesia, chalk, or small pieces of soap softened with water, in milk or raw egg white. Eyes - Wash with water for 15 minutes. Get prompt medical attention

EXTERNAL — Wipe off the acid gently, immediately flood with water, using soap freely, then cover with moist magnesia or baking soda.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and or handling of this material when such use and/or handling is contrary to label instructions.
