EPA REG. NO.  
4828-45

**MANUFACTURING CHEMISTS**

# TK - 80

COMPLETE NON-SELECTIVE WEED CONTROL

<b>ACTIVE INGREDIENTS</b>		<b>93.78%</b>
Aliphatic Petroleum distillates	83.21%	
Xylene	9.57%	
Prometon 2, 4-Bis (isopropylamino)	0.86%	
6-methoxy-s-triazine	0.22%	
<b>INERT INGREDIENTS</b>		<b>6.22%</b>
	Total	<b>100.00%</b>

**CAUTION**

Contains Aliphatic Petroleum Distillates and Xylene

**KEEP OUT OF REACH OF CHILDREN**

(Refer to additional cautions on back panel)

## TK - 80

TK-80 kills both by foliar contact and through the roots, thus it depends on rain to move it into the root area. If soil is dry and there is insufficient rainfall, weed control may be poor.

Can be applied before or after plant growth starts.

Prevents or inhibits plant growth for a year or more when applied to the soil.

Use only in areas where complete control of all vegetation is desired. Do not use on land to be planted or where adjacent desirable trees, shrubs, or plants might be injured. Do not apply to areas underlaid by desirable trees and shrubs.

TK-80 is non-corrosive to equipment.

Use for effective and economical control of weeds around industrial sites, rights of way, lumber yards, petroleum tanks, farms, farm buildings, along power lines, railroad yards and trestles, telephone, telegraph and utility power line poles, power substations, highway bridges, signposts, road markers and shoulders, general highway maintenance, warehouses, mills, drainage ditches, airfields, runways and landing lights, outdoor theatres, tennis courts and school playgrounds.

### DIRECTIONS

1 TK-80 prior or up to 3 months after weed emergence. Best results obtained prior to emergence or when weeds are young and actively growing.

**CONTROL OF ANNUAL AND SUSCEPTIBLE PERENNIAL WEEDS** - Such as downy brome grass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, and plantain -

(a) Add 1/2 gallon to 5 gallons of water and apply as a contact spray to cover ap-

proximately 100 sq. feet. Make certain all parts of the plants are thoroughly wet.

**CONTROL OF HARD-TO-KILL PERENNIAL WEEDS AND GRASSES** - Such as Johnsongrass, bindweed or wild carrot.

(a) Use approximately 2 gallons of TK-80 in sufficient water to give thorough and uniform coverage per 100 sq. feet.

**NOTE:** For faster top-kill of existing vegetation, apply in diesel, fuel or weed oil, and use enough oil for thorough coverage.

Do not use or store near heat or open flame. Store at temperatures above 32°F. Do not contaminate water by cleaning of equipment, or disposal of wastes.

## CAUTION

Avoid contact with eyes and skin. In case of skin contact, wash with soap and water. Avoid inhalation of spray mist. Avoid contamination of food and feed. Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Call physician immediately.

Do not reuse empty containers. Destroy by perforating or crushing, or return drums to drum reconditioner. If perforated or crushed, empty containers or drums should be buried or discarded in a safe place away from water supplies.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
