MANUFACTURING CHEMISTS

W K N S - 8

COMPLETE NON-SELECTIVE WEED CONTROL

ACTIVE INGREDIENT:

Prometon 2,4-Bis (isopropylamino)-
 6-methoxy-2-triazine 0.86%

INERT INGREDIENTS 99.14%

TOTAL 100.00%

CAUTION

THIS PRODUCT CONTAINS THE TOXIC INERTS XYLENE
AND ALIPHATIC PETROLEUM HYDROCARBONS

KEEP OUT OF REACH OF CHILDREN

(REFER TO ADDITIONAL CAUTIONS ON BACK PANEL)

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Do not use or store near heat or open flame. Store at temperatures above 32° F. Do not contaminate water by cleaning of equipment, or disposal of wastes.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL: Do not reuse empty containers. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Kills both by foliar contact and through the roots, thus it depends on rain to move it into the root area. If soil is dry and there is insufficient rainfall, weed control may be poor.

**** Do not apply this product through any type of irrigation system. ****

Can be applied before or after plant growth starts. Prevents or inhibits plant growth for a year or more when applied to the soil.

Use only in areas where complete control of all vegetation is desired. Do not use on land to be planted or where adjacent desirable trees, shrubs, or plants might be injured. Do not apply to areas underlaid by desirable trees and shrubs.

Non-corrosive to equipment.

Use for effective and economical control of weeds around industrial sites, rights of way, lumber yards, petroleum tanks, farms, farm buildings, along fence lines, railroad yards and trestles, telephone, telegraph and utility power line poles, power substations, highway bridges, signposts, road markers and shoulders, general highway maintenance, warehouses, mills, drainage ditches, airfields, runways and landing lights, outdoor theatres, tennis courts and school playgrounds.

Use prior or up to 3 months after weed emergence. Best results obtained prior to emergence or when weeds are young and actively growing.

CONTROL OF ANNUAL AND SUSCEPTIBLE PERENNIAL WEEDS: Such as downy brome grass, oat grass, goose grass, quack grass, puncturevine, goldenrod, and plantain.

A. Add 1/2 gallon to 5 gallons of water and apply as a contact spray to cover approximately 100 sq. feet. Make certain all parts of the plants are thoroughly wet.

CONTROL OF HARD-TO-KILL PERENNIAL WEEDS AND GRASSES: Such as Johnson grass, bindweed or wild carrot.

A. Use approximately 2 gallons in sufficient water to give thorough and uniform coverage per 100 sq. feet.

NOTE:: For faster top-kill of existing vegetation, apply in diesel fuel or weed oil, and use enough oil for thorough coverage.

CAUTIONS

Avoid contact with eyes and skin. In case of skin contact, wash with soap and water. Avoid inhalation of spray mist. Avoid contamination of food and feed. Harmful or fatal if swallowed. If swallowed, do not induce vomiting. Call physician immediately.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use or handling is contrary to label instructions.
