Q SAN

Room Fogging: Apply Q San as follows, as an adjunct to manual cleaning and disinfecting, to reduce the hazard of cross-infection from environmental surfaces. Remove all human or plant life from room. Open closet doors and drawers. Set up revolving sprayer or other fogging device in center of room. Unit should operate at 3 RPM. Fill reservoir with 1½ oz. of Q San mixed with 1 gallon of water. Set sprayer to deliver 1 gallon of solution. Fog for 15 minutes in an average 2100 cu. ft. room. Adjust spray time proportionately for other room sizes, so as to insure complete wetting of all surfaces. Enter room only 2 hours after treatment is completed. Rinse spraying device with clear water. Now proceed with routine terminal cleaning and disinfecting.

Cold Disinfecting: Submerge previously cleaned surgical instruments, dental equipment and barber tools in a Q San solution containing 1½ oz. per gallon of water for at least 10 minutes.

Sanitizing

- (1) **Food Processing Equipment & Food Utensils** — Dilute 1 oz. of Q San per 4 gallons of water. At this level, no potable water rinse is required.
- (2) For dishes, glassware, cooking utensils, or silverware, first wash with soap or synthetic detergent, rinse thoroughly and immerse in a Q San sanitizing solution of 1 oz. per 4 gallons of water. No terminal potable water rinse needed.
- (3) **Dairy Equipment** — Clean and rinse equipment thoroughly, then apply a solution of Q San of 1 oz. per 4 gallons of water. No potable water rinse required. Follow local Health Board recommendations.

Hospitals: For floors, walls and other surfaces such as sink tops, garbage pails, telephones and restrooms, use 3½ oz. of Q San per 5 gallons of water. Q San is effective against *Pseudomonas aeruginosa* PRD-10 at this level.

Other areas of use: To sanitize and disinfect floors, walls and inanimate hard surfaces in schools, locker rooms, classrooms, corridors, offices and shower stalls apply with mop or cloth. **To Sanitize** — use 1 ounce of Q San in 4 gallons of water. **To Disinfect** — use 3 ounces of Q San in 5 gallons of water. Disinfecting application kills *Staphylococcus aureus* and *Salmonella choleraesuis*.

DANGER

Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

First Aid — In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

Rinse empty container thoroughly with water and discard.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
