MANUFACTURING CHEMISTS
REPELLEX "L"
Cattle Spray and Repellent
(Protects Beef and Dairy Cattle from biting flies)

ACTIVE INGREDIENT	PERCENTAGE
Permethrin	0.50
Esperalol butoxide tetraol	0.50
Neostigmine methylsulfate	0.50
Diethyltoluamide	0.50
Petroleum distillate	1.00
Equivalents of water	92.00
Water-soluble emulsifier	1.00

CAUTION
CONTAINS PETROLEUM DISTILLATES
KEEP OUT OF REACH OF CHILDREN

REPELLEX "L"

Repellex "L" protects animals including beef and dairy cattle from the attacks of biting flies both in the barn and on the pasture. It also is an effective space spray for quick knockdown and kill of house flies in the barn and milkroom.

As an Animal Spray - Apply just enough to wet the hair ends, but not enough to soak the hide to protect the animals against the attacks of horseflies, stable flies, horn flies, mosquitoes and gnats. One to two ounces applied daily, and preferably in the morning, is sufficient to treat an adult cow. Repeat daily or as necessary for continued protection.

Space Spray - To attain quick knockdown and kill of flies, gnats and mosquitoes in enclosed spaces, spray toward ceiling and corners until space is filled with light mist. For best results, close all windows and doors prior to spraying and keep them closed for 10 to 15 minutes after spraying. Remove all animals from area before spraying and do not return animals until area has been completely aired out after spraying.

CAUTION

STORE OUT OF REACH OF CHILDREN

Do not overapply to animals. Protect milk and milking utensils from contamination by the spray. Do not store or spray near an open flame. Harmful if swallowed. Store in a cool place. Keep container tightly closed.

Do not reuse container.

Destroy when empty.

Do not reuse empty drum or container. Turn drums to a safe condition or destroy both drums and contents by perforating or crushing them. Do not use in a safe place away from water pipes.
