algi-kare

algaecide

For Swim and Splasher Pools

ACTIVE INGREDIENTS:

n-Alkyl(58%C14, 28%C16, 14%C12)dimethyl	
benzyl ammonium chloride.....	7.5%
INERT INGREDIENTS.....	92.5%
	Total 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER

See back panel for additional precautions
and first aid statement.

NET CONTENTS: 1 Gallon (128 fl. oz.) 3.785 liters

CHEMICAL PROPERTIES

Algi-Kare is an outstanding algae growth depressant in all types and sizes of pools. Helps eliminate and prevent odors from confined water. Algi-Kare is fully compatible with alkalizing and flocculating agents normally used in swimming pools and is relatively non-corrosive to rubber and metals. Works most effectively at pH levels over 7.0. Highly concentrated.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Algae and slime may be effectively controlled with an initial dose of 1 gallon Algi-Kare per 30,000 gallons of pool water. Visible algae growth will require vacuuming to remove algae debris. If visible algae is still present or reappears, repeat initial dose. For subsequent treatments, use one quart of Algi-Kare per 30,000 gallons of pool water every 4 days. In hot sunny weather, this dosage should be used every 2 days. For treatment of small pools, use one pint to 3,500 gallons of water or one cup to 1,500 gallons. Algi-Kare should be added to the pool at various points or added through the filter. Each time the pool is drained and refilled, repeat initial dose. To sanitize (non-food contact surfaces) walls, locker rooms and other areas surrounding pool, apply with a clean mop or sponge, a solution made with 2 ounces of Algi-Kare in 4 gallons of water for a minimum contact time of 5 minutes.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call physician. If skin irritation persists, get medical attention. If swallowed, promptly drink large quantities of milk, egg whites or gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the E.P.A.

STORAGE AND DISPOSAL

Do not reuse empty container. Wrap container and place in trash.
