DIRECTIONS FOR USE

Iso Clor Tablets are to be used as a disinfectant and algae control in pool water. For initial treatment of swim pools free of visible algae growth, use 4 tablets of Iso Clor per 1,000 gallons of pool water repeated daily for a period of 4 to 6 weeks. For subsequent use, add 2 tablets per 1,000 gallons of water daily or as needed as determined by a chlorine test kit to maintain a 0.7 to 1.0 ppm (parts per million) residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather load, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results. Six Iso Clor Tablets weigh one ounce.

For use in wader or splasher pools, recommended dosage is at the rate of 3 tablets per 750 gallons every day.
