CHEMICAL PROPERTIES

Coastal Cal Jet Algaecide Liquid is an outstanding algae growth depressant in all types and sizes of pools. It helps eliminate and prevent odors from confined water. Coastal Cal Jet Algaecide Liquid is fully compatible with alkalizing and flocculating agents normally used in swimming pools and is relatively non-corrosive to rubber and metals. It may be used with all types of equipment and works most effectively at pH levels over 7.0. Highly concentrated.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Algae and slime may be effectively controlled with 1 gallon of Coastal Cal Jet Algaecide Liquid per 30,000 gallons of water. This is an initial treatment after the usual cleaning operation. For subsequent treatments, use 1 quart of Cal Jet Algaecide Liquid for each 30,000 gallons of water every 4 days. For initial treatment of small pools, use 1 pint to 4,000 gallons of water or 1 cup to 2,000 gallons. One cubic foot is about 7-1/2 gallons. In hot, sunny weather this dosage should be used every 2 days. Cal Jet Algaecide Liquid should be placed in the pool at various points or added through the filter. Each time the system is drained and refilled, repeat initial dose. To sanitize walls, runways, locker rooms and other areas surrounding swimming pool, apply with a clean mop or sponge, using a solution of 2 ounces of Cal Jet Algaecide Liquid in 4 gallons of water.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS

DANGER: Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Harmful if swallowed. Avoid contamination of food. Remove and wash contaminated clothing before reuse.

STATEMENT OF PRACTICAL TREATMENT

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes call a physician. If skin irritation persists, get medical attention. If swallowed, promptly drink large quantities of milk, egg whites, or gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters unless in accordance with an NPDES permit. For guidance, contact your regional office of the E.P.A.
