

CHEMICAL PROPERTIES

EASILY SOLUBLE IN ALL POOL WATER
LONG LASTING CHLORINE RESIDUAL
FORTIFIED WITH WATER SOFTENERS

ACCEPTED
4829-51
NOV 18 1975

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
UNDER NO.

DANGER:

KEEP OUT OF REACH OF CHILDREN. Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wash hands after handling.

FIRST AID:

If swallowed, feed gruel, cooked cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

DANGER:

STRONG OXIDIZING AGENT. Mix only with cold water. Use clean, dry utensils. Contamination by moisture, organic matter or other chemicals may liberate hazardous gases. Store in cool, dry, well ventilated area away from heat or open flame. Decomposes at 350°-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air. Flood with large amounts of water. Keep container tightly closed when not in use. Do not reuse empty container. Rinse empty container thoroughly with water before discarding.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

DIRECTIONS FOR USE

Iso Clor Tablets should be added to pools free of visible algae. Add tablets through a floating dispenser. For initial treatment, use 12 to 24 tablets per 1,000 gallons of pool water. For subsequent treatments, add 4 tablets of Iso Clor per 1,500 gallons of water daily or as needed as determined by test kit to maintain a 1.0 to 1.5 ppm. (parts per million) chlorine residual. Adding 1 tablet will increase the available chlorine by approximately 0.3 ppm. High temperatures, organic contamination, increased bather use, rain and other factors may necessitate more frequent treatments. Using a chlorine and pH test kit, test water frequently to assure proper concentration of chlorine and pH. Maintain pH range of 7.2 to 7.6 at all times. For use in wader and splasher pools, recommended dosage is 3 Iso Clor tablets per 750 gallons every day. Maintain a chlorine residual of 1.0 to 1.5 ppm. as determined by a test kit. 6 tablets weigh approximately one ounce.
