

CHEMICAL PROPERTIES

Contains 56% Available Chlorine - 50.4% 2,4,6, Trihydroxy-s-Triazinetrione

**EASILY SOLUBLE IN ALL POOL WATER · LONG LASTING
CHLORINE RESIDUAL · KEEPS WATER SPARKLING CLEAR
NO CLOUDY BUILD-UP**

DANGER:

KEEP OUT OF REACH OF CHILDREN Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wash hands after handling.

FIRST AID:

If swallowed, feed gruel, cooked cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

DANGER:

STRONG OXIDIZING AGENT. Mix only with cold water. Use clean, dry utensils. Contamination by moisture, organic matter or other chemicals may liberate hazardous gases. Store in cool, dry, well ventilated area away from heat or open flame. Decomposes at 350°-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air. Flood with large amounts of water. Keep container tightly closed when not in use. Do not reuse empty container. Rinse empty container thoroughly with water before discarding or returning to drum reconditioner.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

DIRECTIONS FOR USE

Iso Clor Powder is used as a disinfectant and algae control in pool water. For initial treatments of swim pools free of visible algae growth, use 2 ounces of Iso Clor Powder per 1000 gallons of pool water. This dosage will provide about 8.75 ppm. (parts per million) of chlorine to help satisfy the water's chlorine demand. Do not use the pool until the chlorine residual drops below 2.0 ppm. For subsequent use, add 1/8 to 1/4 oz. per thousand gallons of water daily or as needed as determined by chlorine test kit to maintain a 1.0 to 1.5 ppm. residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather load, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results. Always distribute powder over extensive area of pool water surface.

For use in wader and splasher pools, recommended dosage is at the rate of 1/2 ounce per 750 gallons of water every day.
