

CHEMICAL PROPERTIES

Contains 56% Available Chlorine - 50.4% 2,4,6, Trihydroxy-s-Triazinetrione

**EASILY SOLUBLE IN ALL POOL WATER · LONG LASTING
CHLORINE RESIDUAL · KEEPS WATER SPARKLING CLEAR
NO CLOUDY BUILD-UP**

DANGER:

KEEP OUT OF REACH OF CHILDREN Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wash hands after handling.

FIRST AID:

If swallowed, feed gruel, cooked cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

DANGER:

STRONG OXIDIZING AGENT Mix only with cold water. Use clean, dry utensils. Contamination by moisture, organic matter or other chemicals may liberate hazardous gases. Store in cool, dry, well ventilated area away from heat or open flame. Decomposes at 350°-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air. Flood with large amounts of water. Keep container tightly closed when not in use. Do not reuse empty container. Rinse empty container thoroughly with water before discarding.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

DIRECTIONS FOR USE

Iso Clor Tablets are to be used as a disinfectant and algae control in pool water. For initial treatments of swim pools free of visible algae growth, use 12 tablets of Iso Clor per 1,000 gallons of pool water. This dosage will provide about 8.75 ppm. (parts per million) of chlorine to help satisfy the water's chlorine demand. Do not use the pool until the chlorine residual drops below 2.0 ppm. For subsequent use, add 1 to 2 tablets per 1,000 gallons of water daily or as needed as determined by chlorine test kit to maintain a 1.0 to 1.5 ppm. residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather load, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results. For use in wader and splasher pools recommended dosage is at the rate of 5 tablets per 750 gallons of water every day. Six Iso Clor tablets weigh one ounce.

DIRECTIONS FOR USE

Tarry 7-Day Big Tabs are fast acting disinfectant and algaecide in pool water. They are long lasting and slowly feed chlorine into pool water. In order to receive its maximum effect use as follows:

1. Superchlorinate the pool water with Coastal's fast acting Iso Chlor stabilized dry chlorine to a level of 10 ppm. (parts per million), free available chlorine. Follow directions on the label for that product. Do not use pool until chlorine residual drops to 2.0 ppm.
2. Adjust cyanuric acid level in pool water to 30 ppm. (parts per million) using Coastal's Chlorine Stabilizer following label directions.
3. Add 1 Tarry 7-Day Big Tab per 5,000 gallons of pool water into floating dispenser or top water skimmer, every week or as needed as determined by chlorine test kit to maintain a 1.0 to 2.0 ppm. (parts per million), residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather load, water should be checked every 2 hours. Tarry 7-Day Big Tabs will tend to lower pH of pool water. Maintain a pH level of 7.2 to 7.6 for best results.

One Tarry 7-Day Big Tab weighs approximately 5-1/3 ounces (150 grams), and WILL LAST APPROXIMATELY 1 WEEK DEPENDING ON TEMPERATURE, BATHER LOAD AND AMOUNT OF WATER FLOW. Tabs should never be thrown directly into pool as they may cause spotting or bleaching. Not recommended for wader and splasher pools. Approximately 1/3 ounce of Tarry per 10,000 gallons of water will raise available chlorine concentration by 0.1 ppm.

DANGER: KEEP OUT OF REACH OF CHILDREN.

Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wash hands after handling.

FIRST AID:

If swallowed, feed gruel, cooked cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

DANGER: STRONG OXIDIZING AGENT...

Add only to large volume of water. Measure with clean, dry spoon or scoop. Contamination by moisture, organic matter, or other chemicals may liberate hazardous gases. Store in a cool, dry, well-ventilated area away from heat or open flame. Decomposes at 350°-475°F with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air. Flood with large amounts of water. Keep container tightly closed when not in use. Rinse empty container thoroughly with water to dissolve all material before discarding. DO NOT MIX WITH ANY OTHER CHEMICAL, CHLORINE OR ISO CLOR PRODUCT.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.
