Attention: Barbara A. Hoffmann  
Regulatory Manager

Subject: Tarry 7-Day Stabilized Chlorinating Big Tabs  
EPA Registration Number 4829-55  
Your Submission Dated February 20, 1990

This is in response to your request to amend the registration of the subject product to include labeling revisions.

The amendment referred to above submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, is acceptable provided that you:

- 1) Make the following labeling revisions before you release the product for shipment bearing the amended labeling.
  - o Correct the spelling of "product" in the third sentence of the Physical and Chemical Hazards. Also, correct the spelling of "gases" in the fifth sentence of this same section.
- 2) Submit five (5) copies of the final printed labeling for inclusion in the product file.

Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

SURNAME								
DATE								

Note that the recommended Environmental Hazards statements are the ones that are in the Registration Standard (i.e., Guidance for the Reregistration of Pesticide Products Containing Chlorinated Isocyanurates as the Active Ingredient). Although your product is not a manufacturing use product, it does contain 99.3% of the active ingredient "Trichloro-s-triazinetrione." We are recommending these statements for products that contain such a high percentage of a single active ingredient.

If you have any questions in this regard, please contact Ms. Ruth Douglas at (703) 557-3842.

Sincerely yours,

Walter C. Francis  
Acting Product Manager (32)  
Antimicrobial Program Branch  
Registration Division (H7505C)

COASTAL

TARRY

7-DAY STABILIZED CHLORINATING BIG TABS

Bactericide · Algaecide · Disinfectant

ACTIVE INGREDIENT:

Trichloro-s-triazinetrione.....	99.3%
INERT INGREDIENTS.....	0.7%
	Total 100.0%

Available Chlorine.....90.0%

KEEP OUT OF REACH OF CHILDREN  
DANGER

See back panel for additional precautions and  
statement of practical treatment.

NET WEIGHT: 15 lbs. (6.804 kg)  
45- 5-1/3oz. Tablets

**ACCEPTED**  
with COMMENTS  
in EPA Letter Dated:

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

4829-55

CHEMICAL PROPERTIES  
Contains 90% Available Chlorine  
Soluble in all Pool Water  
No Alkali Build-Up  
Long-Lasting Chlorine Residual  
Slow Dissolving  
For use in Automatic or Floating Dispensers

ACCEPTED  
with COMMENTS  
in EPA Letter Dec. 4

MAR 26 1990

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registration number, Reg. No.

DIRECTIONS FOR USE

4829-55

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Tarry 7-Day Stabilized Chlorinating Big Tabs are to be used as a disinfectant and algae control in pool water. They are long-lasting and are intended to slowly meter chlorine into pool water. In order to receive its maximum effect, use as follows:

1. Superchlorinate the pool water with Coastal's fast acting Blast One Shot Shock treatment, or other chlorinating product. Follow label directions for these products. Do not enter pool until the chlorine residual drops to 2.0 ppm (parts per million).
2. Using Coastal Chlorine Stabilizer, adjust the cyanuric acid level in pool water to 35 ppm following label directions.
3. Adjust the pH to the ideal range of 7.2 to 7.6 with Coastal pH Plus if the pH is below 7.2 or pH Minus if the pH is above 7.6.
4. Add one Tarry 7-Day Stabilized Chlorinating Big Tab per 7,500 gallons of pool water into floating dispenser every week, or as needed as determined by a chlorine test kit to maintain a 1.0 to 1.5 ppm (parts per million) residual chlorine. Check water for chlorine content at regular intervals. During extreme heat or with heavy bather loads, water should be checked every 2 hours. Maintain a pH level of 7.2 to 7.6 for best results.

One Tarry Tablet weighs approximately 5-1/3 ounces (150 grams) and WILL LAST APPROXIMATELY ONE WEEK DEPENDING ON TEMPERATURE, BATHER LOAD AND AMOUNT OF WATER FLOW.

Tabs should never be thrown directly into pool as they may cause spotting or bleaching. Not recommended for splasher or wader pools.

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep Out of Reach of Children. Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles or face shield and rubber gloves when handling. Use only thoroughly clean, dry utensils. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

### STATEMENT OF PRACTICAL TREATMENT

#### FIRST AID:

IF ON SKIN: Brush off excess chemical and flush skin with water for at least 15 minutes. If irritation persists, get medical attention.

IF INHALED: Remove person to fresh air. Get immediate medical attention.

IF IN EYES: Flush with cold water for at least 15 minutes. Get immediate medical attention.

IF SWALLOWED: Promptly drink large quantities of water. DO NOT induce vomiting. Call physician immediately.

### PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. Isolate container (if possible) in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

### STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat and open flame. In case of decomposition, do not reseal container. Isolate container (if possible) in open air or well ventilated area. Flood with large volumes of water to dissolve all material before discarding container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
