

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidelines contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT Mix only with water. Use clean dry vessels. Do not add this product to any swimming device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat. Liberation of hazardous gases and possible generation of fire and explosion may result. If contamination or decomposition, do not touch the container. If gas is evolved, do not breathe it open or do not inhale it. Flush with large volumes of water if necessary.

PRACTICAL TREATMENT

FIRST AID If swallowed, feed liquid washed in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in cool dry well ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flush with large amounts of water to dilute all material before discarding. Place in trash collection or dispose in approved landfill area or bury in safe place.

AVAILABLE CHLORINE CONTENT IS 56%

Tab-A-Day Fast Dissolving Chlorinating Tablets provides effective control of bacteria and algae growth in pool water. Do not add this product directly to pool water or to automatic tablet chlorinating devices. Tab-A-Day Fast Dissolving Chlorinating Tablets are intended for addition to the pool skimmer or into a floating dispenser. Do not mix this product with any other chemicals.

Chlorinating TABLETS for: 20,000 Gal. Pools

DIRECTIONS FOR USE

STARTUP When starting up a new or freshly filled swimming pool make sure that the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.2-7.8. Use Coastal pH Plus or pH Minus as indicated by a Coastal Test Kit. Then Superchlorinate either with Shock Treatment or Stabilized Chlorinating Granules to establish a positive free chlorine residual of 10-20 parts per million (ppm). Raise the cyanuric acid level if necessary to 30 ppm by adding Chlorine Stabilizer following directions for that product.

DAILY Add Tab-A-Day Fast Dissolving Chlorinating Tablets to the pool skimmer as necessary to maintain a 1.0-2.0 ppm chlorine residual. A suggested dosage is one Tab-A-Day tablet per 20,000 gallons daily. This dosage may vary due to unusual conditions such as heavy bather loads, wind, heavy rain and high temperatures. Therefore frequent use of the Test Kit is recommended as a guide to maintain the pH at 7.2 to 7.8 and the chlorine residual at 1.0-2.0 ppm.

This product was filled in captivity using modern equipment; therefore, products may settle during shipment.
