DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Coastal Percloron Chlorinating Granules is a concentrated chlorine agent in a dry, free-flowing form. Percloron Granules control the growth of algae and effectively kills many bacteria, thereby helping to keep the pool in sanitary condition. Use clean, dry scoop to measure Percloron Granules.

READ PRECAUTIONARY STATEMENTS BEFORE USE!

INITIAL CHLORINATION: For new pools, spring start-up or superchlorination, add 1 oz. of Percloron Granules per 1,000 gallons of pool water to yield 5-10 ppm available chlorine. After 1 hour, use a Coastal Test Kit to determine the chlorine residual. If below 1.0 ppm (parts per million), repeat dosage until 1-3 ppm is obtained. For best results, prepare a solution (1 oz. of granules per 1/2 gal of water) or scatter granules over a wide area of pool water surface. Do not enter pool until chlorine residual is between 1.0 to 3.0 ppm.

ROUTINE CHLORINATION: Add 1 oz. of Percloron Granules per 10,000 gallons of pool water by sprinkling the granules over a wide area of pool water surface to yield an available chlorine residual of 0.6-1.0 ppm by weight. Stabilized pools should maintain a chlorine residual of 1.0-1.5 ppm. Using a Coastal Test Kit as a guide, maintain the pH of the pool water at 7.2 to 7.6. If the pH is below 7.2, add Coastal pH Plus in accordance with its label directions. If the pH is higher than 7.6, lower the pH with the addition of Coastal pH Minus, following label directions. Frequency of water treatment will depend upon temperature, bather load and amount of water flow.

SUPERCHLORINATION: Once a week, or if algae is present, superchlorinate pool water by adding 1 oz. per 1,000 gallons of pool water. Thoroughly clean pool by scrubbing surface of algae growth. Then vacuum and cycle through filter. Pool should not be entered until chlorine residual returns to 1-3 ppm.

TO DETERMINE POOL CAPACITY (IN U.S. GALLONS)

Rectangular or Square Pools - Multiply length x width x average depth (all in feet) x 7.5 = Gallons

Circular Pools - Multiply diameter x diameter x average depth (all in feet) x 5.9 = Gallons

Oval Pools - Multiply length x width x average depth (all in feet) x 5.6 = Gallons

**WINTERIZING:** While water is still clean and clear, apply 0.6 oz. of Percloron Granules per 1,000 gallons of pool water, while filter is running. Cover and close pool in accordance with manufacturers instructions.

**PRECAUTIONARY STATEMENTS
