NOTICE OF PESTICIDE: ☐ REGISTRATION
☒ REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Coastal Wet Shock

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Coastal Industries, Inc.
130 Jony Drive
P.O. Box 0017
Carlstadt, NJ 07072

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the General Registration Standard - "Guidance for the Registration and Reregistration of Pesticide Products Containing Sodium or Calcium Hypochlorite as the Sole Active Ingredient"--issued February 1986 and revised April 1986, EPA has reregistered the product listed above in accordance with FIFRA section 3(g). EPA has also reviewed your response to the Sanitizer Label Improvement Program issued July 25, 1986 and has determined that your product is in compliance with the program.

Your amended label has been stamped approved and a copy is enclosed. You must incorporate any comments noted on your label. This label must appear on products released for shipment within 1 year or by the next label printing, whichever occurs first. This label must also appear on all supplemental registrations within 1 year of this notice of Reregistration or at the next label printing, whichever occurs first.

Your product meets the criteria for reregistration under this Standard. Failure to comply with this Standard may result in the Agency's issuance of a Notice of Intent to Cancel the registration under FIFRA section 6(b)(1).

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Turn on filter. Adjust pH to the range of 7.2 to 7.6 prior to using TNT Pool Shock. To control algae and reduce organic contamination in pool water, add 1 lb. TNT Pool Shock per 10,000 gallons of water. Add the total contents of this package by broadcasting (sprinkling) it over a wide area of the pool surface, paying particular attention to the deep end.

IMPORTANT: Add TNT Pool Shock at night or when the pool is not in use. To prevent any possible bleaching effect on vinyl lined pools, either use a pool brush to disperse any undissolved granules settling on the bottom of the pool or predissolve the product in a clean plastic bucket of water. Then sprinkle the solution into the pool. Do not enter the pool until the free chlorine residual has dropped below 3.0 ppm. Use TNT Pool Shock weekly during periods of heavy use or when water temperatures are above 80 F; add once every two weeks in residential pools receiving normal usage. Between treatments, use Coastal sanitizers and pool chemicals to maintain the proper water balance.

WINTERIZING: Adjust pH to 7.2 to 7.6. Add 1 lb. TNT Pool Shock per 10,000 gallons of water in accordance with the above described directions. Run filter until completely dissolved. Then cover the pool with a Coastal pool cover and prepare the heater, pump and filter components for winter by following manufacturer's directions.

STORAGE AND DISPOSAL

Store this product in original container in a cool, dry, well ventilated area away from heat or open flame. The container is designed for one-time use. Do not reuse empty container, but place in trash collection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep Out of Reach of Children. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean, dry utensils. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT

FIRST AID: If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get Medical Attention. If inhaled, remove person to fresh air. Get immediate Medical Attention. If in eyes, flush with cold water for at least 15 minutes. Get immediate Medical Attention. If swallowed, give bread soaked in milk, followed by olive oil or cooking oil. Do not induce vomiting. Call Physician immediately.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not contaminate lakes, streams, ponds or public waters by cleaning of equipment or disposal of wastes.
