use of this material when such use and/or handling
is contrary to label instructions.

Made by
MICRO CHEMICAL COMPANY INC.
Windsboro, Louisiana

DIRECTIONS

The following are general directions and are believed to be reliable,
but not guaranteed. For specific instructions consistent with
label cautions and directions, consult your County Agent.

MIXING: Mixtures should be prepared by slowly adding the required
amount of Micro Blend to at least one-half of the require-
d amount of water with vigorous agitation. When well
mixed, add the rest of water and agitate until mixture
appears milky and free of lumps. Use sufficient
water to give good coverage in accordance with recommenda-
tions below. If a pump is not equipped with a mechanical
agitator, the mixture should be circulated through the
pump and back into tank. The mixture must be
agitated while spraying for best results.
