GENERAL INFORMATION: MICRO DSMA LIQUID Herbicide is useful for selective post-emergent weed control, particularly in grain crops. It is a combination of herbicide and surfactant. It is necessary to add another surfactant to the spray solution. Best results are obtained in cool weather when humidity is high and air temperature above 70°F.

MIXING INSTRUCTIONS: MICRO DSMA LIQUID Herbicide is a liquid concentrate. Fill the spray equipment with water to the required level and add the required amount of MICRO DSMA LIQUID Herbicide. Fill the spray equipment with water to the required level and add the required amount of MICRO DSMA LIQUID Herbicide.

Do not use in areas where it may be carried off by wind. Do not use in areas where it may be carried off by wind.

APPROXIMATE WEED CONTROL: MICRO DSMA LIQUID Herbicide controls many weeds, including: Amaranth, Barnyard grass, Crabgrass, Digitaria, Echinochloa, Goosegrass, Johnsongrass, Knotgrass, Lambsquarters, Pigweed, Smartweed, and many others.

DO NOT FEED TREATED AREAS: Do not feed treated areas to livestock. Do not feed treated areas to livestock.

MICRO DSMA LIQUID HERBICIDE DSMA Liquid Plus Surfactant

For Selective Post-Emergent Weed Control

ACTIVE INGREDIENTS:

Disodium Methanearsonate	
Anhydrous* -----	22.1%
INERT INGREDIENTS -----	77.9%
	100.0%

Total Arsenic (as elemental) all in water soluble form ----- 9.0%

*Product contains the equivalent of 3.5 pounds Disodium Methanearsonate Hexahydrate per gallon

CAUTION:
KEEP OUT OF REACH OF CHILDREN

See side panel for additional directions
