Mr. Martin Proops
IntAgra, Inc.
8500 Pillsbury Avenue South
Minneapolis, MN 55420

Dear Mr. Proops:

Subject: Deletion of Active Ingredients from Formulation
SK Surekill Brand Pyrethrin Plus Spray Insecticide with
Vapona
EPA Registration No. 4866-3
Your Application Dated November 9, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

1. The ingredient statement is improperly formatted. Both Active Ingredients and Inert Ingredients should be aligned to the same margin (column form) and equally prominent. If space is limited then the ingredient statement should be listed in paragraph form.
2. Revise the Active Ingredient statement as follows:
"Dichlorvos [2,2-dichlorovinyl dimethyl phosphate]..."
3. The signal word CAUTION is required on the side panel under the heading PRECAUTIONARY STATEMENTS.

The deletion of di-n-propyl isocichomeronate and n-octyl bicycloheptene dicarboximide from your formulation is acceptable.

Sincerely,

George T. LaRocca
Product Manager 13
Insecticide-Rodenticide Branch
Registration Division (H7505C)

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use this product safely. Read entire label before using.

This is a dual-purpose formula designed to protect dairy and beef cattle from attacks of biting flies in barns and out on the pasture, and also to function as an effective space spray for quiet, insect-free and hot of flies in barns.

Animal Spray:

To protect animals against attacks of stable flies, mosquitoes and gnats, apply just enough to wet coat of hair but not enough to soak the skin. One or two ounces is enough to treat an adult cow. Apply once daily, preferably in morning, for protection during day. Repeat daily, or as necessary for continued protection.

Do not apply in excess of one fluid ounce per animal per day. Do not spray within of feeding dairy animals. For milking dairy animals, apply 20 to 30 minutes before beginning to milk. Do not apply to animals under 6 months of age.

Space Spray for Barn Fly Control:

To attack quiet mosquitoes and kill of flies, gnats and mosquitoes in enclosed spaces, spray toward ceiling and corners until spaces is filled with light mist. Apply at rate of one to two ounces per 1000 cubic feet. Do not treat animals or humans. Do not eat, drink, water, feed or feedstuffs, milk or milking utensils. Do not use in areas where animals have received direct application within 8 hours.

Remove animals prior to treatment. For best results, close all windows and doors prior to spraying and keep them closed for 10 to 15 minutes after spraying. When used in enclosed areas, do not breathe in treated areas after spraying. Ventilate before re-entering.
